[The Life and Death of Sophie Stark](#) 2015-05-19 Anna North Winner of the 2016 Lambda Literary Award for Bisexual Fiction "I read *The Life and Death of Sophie Stark* with my heart in my mouth. Not only a dissection of genius and the havoc it can wreak, but also a thunderously good story."—Emma Donoghue, New York Times bestselling author of *Room* "This novel is perceptive, subtle, funny and lingers in unexpected ways. The analysis of a woman who puts her art above all else is equal parts inspiration and

warning story. Anna North makes prose look easy."—Lena Dunham Gripping and provocative, *The Life and Death of Sophie Stark* is a haunting story of fame, love, and legacy told through the propulsive rise of an iconoclastic artist. Sophie Stark begins her filmmaking career by creating a documentary about her obsession, Daniel, a college basketball star. But when she becomes too invasive, she finds herself the victim of a cruel retribution. The humiliation doesn't stop her. Visionary and unapologetic, Sophie begins to use stories from the lives of those around her to create movies, and as she gains critical recognition and acclaim, she risks betraying the one she loves most. Told in a chorus of voices belonging to those who knew Sophie best, *The Life and Death of Sophie Stark* is an intimate portrait of an elusive woman whose monumental talent and relentless pursuit of truth reveal the cost of producing great art. It is "not only a dissection of genius and the havoc it can wreak, but also a thunderously good story" (Emma Donoghue).

*The Seven Lives of John Murray* 2009 Humphrey Carpenter From its birth in 1768, when the first John Murray of Edinburgh came down to London, each of the publishing house's seven leaders has made his own

contribution to the dissemination of literature and the understanding of the world. One became Byron's publisher and confidante; another began the revolutionary series of Murray handbooks which transformed world travel in the early years of the railways; a third broke controversial new ground with the publication of Queen Victoria's letters. So the tradition progressed to the end of the 20th century, and a list of literary giants including Patrick Leigh Fermor, Osbert Lancaster, Françoise Sagan, and British Poet Laureate, John Betjeman. Written in Carpenter's rollicking and iconoclastic style, it is an affectionate and vibrant account of the longest-surviving publishing house in the world.

*Health in the European Union* 2009 Philipa Mladovsky Good health can be considered one of the most fundamental resources for social and economic prosperity. While the goal to improve average levels of population health is important, there has been an increasing focus on disparities at national and European levels. Improvements have been seen over the past few decades in both health status and living and working conditions has widened tremendously in the European Union (EU) and will continue to do so as it goes through the enlargement process. The diversity in living conditions has translated into diversity in patterns of health across the region. Inequalities in income, education, housing and employment affect population health, both directly (for example, good housing reduces risks associated with poor health) and indirectly through psychosocial factors (such as stress). From the life course perspective, individuals are affected by different sets of risks related to disease and illness; certain diseases and causes of health are more likely to affect young people, whereas the majority are associated with older ages. Investigating differences in health status within and between European countries provides the focus of this report. The relationship between living conditions, socioeconomic factors and health is discussed and analysed with the objective of stimulating a debate and policy action for creating a healthier and more equitable society. We aim to present an overview of key issues and not comprehensive literature review or exhaustive analysis of the topics involved.

**Intersectional Analysis as a Method to Analyze Popular Culture** 2019-11-27 Erica B. Edwards Intersectional Analysis as a Method to Analyze Popular Culture: Clarity in the Matrix explores how race, class, gender, sexuality, and other social categories are represented in, and constructed by, some of the most significant popular culture artifacts in contemporary Western culture. Through readings of racialized television sitcoms, LGBTQ+ representation in mainstream American music, the role of Black Panther in Western imperialist projects, and self-love narratives promoted by social media influencers, it demonstrates how novice and emerging researchers can use intersectional theory as an analysis method in the field of cultural studies. The case studies presented are contextualized through a brief history of intersectional theory, a methodological rationale for its use in relation to popular culture, and a review of the ethical considerations researchers should take before, during, and after they approach popular artifacts. Intended to be a textbook for novice and emerging researchers across a wide range of social science disciplines, this book serves as a practical guide to uncover the multiple and interlocking ways oppression is reified, resisted and/or negotiated through popular culture. 2021 Winner of the AESA Critics' Choice Book Award

Voodoo River 2013-07-16 Robert Crais Elvis Cole finds himself deep in the bayou of Louisiana searching for the estranged parents of a television star -- but something deadly is looking for him. L.A. private eye Elvis Cole is hired by popular television star Jodie Taylor to delve into her past and identify the biological parents who gave her up for adoption thirty-six years before. Cole's assignment is to find out their biological history and report back. It seems all too clear cut. But when he gets to Louisiana and begins his search, he finds that there's something much darker going on. Other people are also looking for Taylor's parents, and some are ending up dead. And when Cole realizes that his employer knew more than she was telling, Voodoo River becomes a twisting tale of identity, secrets, and murder.

*Aliens in Wonderland* 2010-02 Alpha An informative in-depth look at the lives of several extraterrestrials (E.T.'s), Extraterrestrial Biological Entities (E.B.E.'s), and aliens, what their lives are like on their planets in their galaxies, what their spaceships are like, and how they are connected to us here on Earth. In addition, the book delves into how they are important to our religion and military strength. This novel also looks at some historical revelations, future predictions, and current happenings including an interesting collection of anecdotes regarding an ex-CIA agent who gets his wishes granted. It's the author's intention to, at the very least, bridge the gaps that exist between the religions of our generation. One gap is between our present long standing accepted knowledge of our concept of God, and our comprehensible real God. As well, a gap exists between how we are told we should interpret and demonstrate the meaning of God and how we show our faith and prove our belief in the living Creator. These are some things that the author thinks everyone needs to know about God, Satan, and UFOs. This book has been a long time in the making, twenty years, but somehow it still manages to remain ahead of its time, in most cases.

**Construction Supply Chain Economics** 2007-12-11 Kerry London This is the first comprehensive investigation of the industrial sourcing and procurement practices throughout sixty-eight construction

industry supply channels across seven major commodity sectors at all levels. London presents real-world case studies to combine theory and practice to describe the economic structural and behavioural characteristics of sectors integral to the construction industry performance. Construction Supply Chain Economics details 'everyday' experiences and procurement decisions made by people in firms in the industry related to projects as they seek out other firms to work with during the tendering stage. London creates a language that enables us to classify and understand behaviour and recognise the impact of our decisions on firms and projects within the industry. Construction Supply Chain Economics introduces a new model for mapping the construction sector of particular interest to construction management and economic researchers and to procurement decision makers, including policymakers and clients, as well as industry practitioners, such as contractors, consultants and materials suppliers.

**Achtung-Panzer!** 1995 Heinz Guderian This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare

had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
