2004-05 René Guénon In East and West Guénon diagnoses the fundamental 'abnormality' of Western civilization vis-à-vis the traditional civilizations of the East, suggests avenues by which the West might be 're-oriented' toward the fundamental metaphysical principles it has largely abandoned, and outlines the possible role of a restoration of true intellectuality in this task. Of course, East and West are no longer what they were in Guénon's time. The aggressive rationalism and materialism of post-Christian Western culture has become a worldwide phenomenon, and no longer corrodes the philosophical and cultural underpinnings of the West only: it has infiltrated distorted forms of Eastern spirituality and metaphysics, incited fundamentalist reactions the world over, and, thanks to the pervasive internet, wields previously unheard of influence. And so today we have an East largely inflamed with a desire to surpass the West in materialism, and a West sodden with moral and spiritual degeneracy. Nonetheless, fruitful exchanges between traditional Christianity and Eastern religions have also taken place on an unprecedented scale, though marred by an ongoing temptation to ill-informed syncretism. In such a milieu, Guénon's East and West, read with an eye to events of recent decades, delivers a stunning intellectual punch. But the East is always the East: the place where the sun rises, the point of recollection and return to the Source. And the West is always the West: the place of the full manifestation of possibilities (including the most degenerate), of the tendency to dissipation and dissolution; the point where the sun sets. In postmodern, global culture, we are all more or less forced to be 'Westerners' outwardly; our only recourse under these circumstances may be to become 'Easterners' within.

2018-07-31 Monte Cook They say there have been eight worlds before ours. Eight times the people of this Earth, over vast millennia, built their civilizations. They reached heights we cannot even imagine now: they spoke to the stars, reshaped the creatures of the world, and mastered form and essence. They built cities and machines that have since crumbled to dust, leaving only their vast outlines and barest remnants. This is the Ninth World. The people of the prior worlds are gonescattered, disappeared, or transcended. But their works remain, in the places and devices that still contain some germ of function. The ignorant call these magic, but the wise know that these are our legacy. They are our future. They are the... Two 416-page corebooks, two poster maps, a handsome and sturdy slipcase, a metal medallion, and additional play aids all for the price of the corebooks alone. All existing Numenera supplements remain compatible with these corebooks.

2001 René Guénon This remarkable book grew out of a conference headed by René Guénon, the sinologist René Grousset, and the neo-Thomist Jacques Maritain on questions raised by Ferdinand Ossendowski's thrilling account in his Men, Beast and Gods of an escape through Central Asia, during which he foils enemies and encounters shamans and Mongolian lamas, whose marvels he describes. The book caused a great sensation, especially the closing chapters, where Ossendowski recounts legends allegedly entrusted to him concerning the 'King of the World' and his subterranean kingdom Agartha. The present book, one of Guénon's most controversial, was written in response to this conference and develops the theme of the King of the World from the point of view of traditional metaphysics. Chapters include: Western Ideas about Agartha; Shekinah and Metatron; The Three Supreme Functions; Symbolism of the Grail; Melki-Tsedeq; Luz: Abode of Immortality; The Supreme Center concealed during the Kali-Yuga; and The Omphalos and Sacred Stones .

2010-09-08 Scott Cunningham Cunningham's classic introduction to Wicca is about how to live life magically, spiritually, and wholly attuned with nature. It is a book of sense and common sense, not only

about magick, but about religion and one of the most critical issues of today: how to achieve the much needed and wholesome relationship with our Earth. Cunningham presents Wicca as it is today: a gentle, Earth-oriented religion dedicated to the Goddess and God. Wicca also includes Scott Cunningham's own Book of Shadows and updated appendices of periodicals and occult suppliers.

2014-04-09 Dr. Douglas M. Baker Esoteric Psychology - The Seven Rays: The knowledge of the Seven Rays provided by this book will prove of immense value to all who seek to understand human nature, and to achieve enhanced self awareness and integration of personality, in themselves and others. This masterly written and illustrated manual is an absolutely essential starting and reference work for all those who finally respond in this lifetime to their Purpose and Inner Voice! This book emphasises that all is energy and that Man is an energy unit affected from both without and within. It demonstrates that Ray Psychology is essentially practical and shows how the qualities of these energies may be understood and embraced in human behaviour and today's language. It is plain that psychology will play an ever increasing role in the development of new age consciousness. Already today millions of people, who would be regarded as laymen, practise their own psychology in everyday life. This tendency has been boosted by the general interest in astrology. A glimpse into the future will show that the new psychology will be based on many emerging astrological factors. Esoteric psychology takes into account not only hereditary and environment, but draws also upon that massive third factor which is the psychic and spiritual nature of Mankind. The effect of karma, the influence of previous lives, etc., are major contributions to the behaviour of those who seek to tread the path towards spiritual enlightenment. Esoteric Psychology is based on two major precepts. Firstly, there is a cosmic force conveying seven streams of energy into our solar system that affect the nature, behaviour and evolution of all forms within the ring-pass-not of this system. These streams are termed the Seven Rays. Secondly, spiritual qualities emerging from the immortal component of Man's structure affect his behaviour and modify the contributing factors of his hereditary equipment and the environment into which it is thrust.

2009 Tracey R. Bashkoff Considering in depth the origins of the Solomon R. Guggenheim Museum when it was first known as the Museum of Non-Objective Painting, this volume reveals for the first time the museums complex and sometimes twisted architectural history and the ambitious exhibition programme organized by Hilla Rebay, the museums founding Director and Curator from 1939 to 1952. Through the extensive correspondence between Rebay and Rudolf Bauer the artist whose work Guggenheim collected exhaustively Karol Vail reveals the important role Bauer played in envisioning the collection and the museum. Fully illustrated throughout, and featuring extensive previously unpublished archival materials, this book provides essential reading and a rich reference of the Guggenheims multifaceted and fascinating history.

2000 Alan Baker This work provides a comprehensive history of the curious occult belief systems that influenced the architects of National socialism and which became central to Nazi philosophy and propaganda. It also shows how these theories continued to flourish after World War II.

2008-03 Sabine Heinz What is it about the arts of the ancient Celts that make them so fascinating for todays fashions and jewellery, graphic design and even architecture? Its as though their ancient magical powers still cast a spell over us. Its easy to see why, when you become familiar with the stories and the representations of the 50 most important symbol groupings. Illustrated texts reveal dozens of cultic figures featured in ancient Celtic rituals, including wild animals and birds, reptiles and fish, trees and flowers, numbers, spirals, crosses, circles and many other designs. Each spread depicts the qualities and values they symbolise, with examples of characters and stories from ancient myths that can be incorporated into modern-day designs.

1968 Alice Bailey Five volumes have been written under the overall title of A Treatise on the Seven Rays, based on the fact, the nature, the quality and the interrelationship of the seven streams of energy pervading our solar system, our planet and all that lives and moves within its orbit.

1975-12-01 Alice A. Bailey The science of esoteric astrology is said to be the basic occult science for the future. It will come into its own as the esoteric or soul factors begin to supersede the exoteric focus of the vast majority of professional and amateur astrologers today. This is the science which deals with those conditioning and governing energies and forces which play through and upon the whole field of space and all that is found within that field. The Ancient Wisdom teaches that Space is an entity. It is with the life of this entity and with the forces and energies, the impulses and the rhythms, the cycles and the times and seasons, that esoteric astrology deals. Esoteric astrology can be applied by the trained worker in a variety of ways; in medicine, psychology, science, education; to an evaluation of human problems, of the destiny of nations, of a correct interpretation of world affairs, and so on. It is necessary, however, that at this stage the application of esoteric astrology to human life should be recognised as experimental and tentative, so that each individual worker can adjust his thinking and his methods according to his own wrought-out experience. to work depend entirely on a consciousness evolving out of control by the personality into the life of the soul, out of separateness and self-centredness into a realisation of unity, and absorption into a centre of group consciousness. Astrology is described in this book as the science of relationships - the relationship existing between all living organisms within the universe. Not only the qualities of the ray energies affect these centres of consciousness, but also the quality and energy of the ruling planets and the zodiacal signs. Seen from the exoteric outside, astrology is a vast and most involved and complex subject. From the esoteric inside, while it is still vast, all-inclusive and complex, it is also possible to perceive the thread which unites and the pattern which prevails throughout the whole system. A basic simplicity in the grand design emerges, therefore, which can serve to interpret the whole. study: (1) The Zodiac and the Rays (2) The Nature of Esoteric Astrology (3) The Science of Triangles (4) The Sacred and Non-Sacred Planets (5) Three Major Constellations (6) The Three Crosses (7) The Rays, Constellations and Planets. In addition there is an appendix which summarises and tabulates many of the factors of fundamental importance to the study of esoteric astrology. This is a book for the true occult student. It may appear to be too highly specialised for some; but every esoteric worker finds eventually that his work requires an understanding of the basic astrological factors which affect all relationships and all forms of life within the ethers of space, so that he may learn how to cooperate intelligently in the evolution of the whole by the right adjustment of the part within that whole; until eventually the many are absorbed into the One. The books of Alice A. Bailey, written in cooperation with a Tibetan teacher between 1919?1949, constitute a continuation of the Ageless WisdomCa body of esoteric teaching handed down from ancient times in a form which is always suitable to each period. writings offer an unparalleled spiritual approach to such subjects as the teaching on Shamballa and the Path of spiritual evolution; the spiritual Hierarchy; the new discipleship and training in meditation as a form of service; the teaching on the seven rays and the new psychology of the soul; the teaching on esoteric astrology; and the new world religion, which emphasizes the common thread of truth linking all the major world faiths.

2021-04-06 Michael Tellinger South Africa and Zimbabwe are home to the largest cluster of ancient stone ruins found to date on Earth. Adam's Calendar is at the centre of it all - the oldest functioning megalithic Sun Calendar found to date. Since 2007, more than 5 million circular stone structures have been identified by Michael Tellinger and a small group of independent researchers. These structures are not "stand-alone" stone circles - they are all connected to each other by channels of stone, and held in a large mesh of agricultural terraces that cover entire mountains and resembles a never-ending spider's web. The great mystery is that the original stone structures have no doors or entrances - indicating that they were not originally constructed as dwellings for people or animals. Additional research and the discovery of mysterious tools and artefacts, indicate that the builders had an advanced knowledge of Cymatics - study of sound - and knew how to use sound as a tool. Together with many ancient gold mines, all this activity has

been dated with various scientific techniques to well over 100,000 years - and provides much support for the presence of the Sumerian Anunnaki on Earth - mining gold in Southern Africa. A place often referred to as the ABZU. Scholars have told us that the first civilization on Earth emerged in a land called Sumer some 6000 years ago. These archaeological findings in southern Africa suggest that the Sumerians inherited much of their knowledge from an earlier civilization that emerged many thousands of years before them in southern Africa, the cradle of humankind.

2012-12-06 Jean-Michel Morel This book contains both a synthesis and mathematical analysis of a wide set of algorithms and theories whose aim is the automatic segmentation of digital images as well as the understanding of visual perception. A common formalism for these theories and algorithms is obtained in a variational form. Thank to this formalization, mathematical questions about the soundness of algorithms can be raised and answered. Perception theory has to deal with the complex interaction between regions and "edges" (or boundaries) in an image: in the variational segmentation energies, "edge" terms compete with "region" terms in a way which is supposed to impose regularity on both regions and boundaries. This fact was an experimental guess in perception phenomenology and computer vision until it was proposed as a mathematical conjecture by Mumford and Shah. The third part of the book presents a unified presentation of the evidences in favour of the conjecture. It is proved that the competition of one-dimensional and two-dimensional energy terms in a variational formulation cannot create fractal-like behaviour for the edges. The proof of regularity for the edges of a segmentation constantly involves concepts from geometric measure theory, which proves to be central in image processing theory. The second part of the book provides a fast and self-contained presentation of the classical theory of rectifiable sets (the "edges") and unrectifiable sets ("fractals").

2017-10-17 Ken Follett The worldwide phenomenon from the bestselling author of The Pillars of the Earth, World Without End, A Column of Fire, and The Evening and the Morning His code name was "The Needle." He was a German aristocrat of extraordinary intelligence—a master spy with a legacy of violence in his blood, and the object of the most desperate manhunt in history. . . . But his fate lay in the hands of a young and vulnerable English woman, whose loyalty, if swayed, would assure his freedom—and win the war for the Nazis. . . .

2009 Trevor Eissler "We know we need to improve our traditional school system, both public and private. But how? More homework? Better-qualified teachers? Longer school days or school years? More testing? More funding? No, no, no, no, and no. Montessori Madness! explains why the incremental steps politicians and administrators continue to propose are incremental steps in the wrong direction. The entire system must be turned on its head. This book ask parents to take a look--one thirty-minute observation--at a Montessori school. Your picture of what educations should look like will never be the same"--Back cover.

1992 Craig A. Evans Unfortunately, achieving even an elementary facility with this literature has in the past depended on either years of experience or a photographic memory. Now Craig A. Evans pulls together the essentials of date, language, text and translations, and general bibliography. He also evaluates the material's relevance for interpreting the NT.

2015 Guy Tillim Co-published by The Walther Collection, this book presents selections from Guy Tillim's most influential works and series of the last decade, including Mai Mai militia in training, Joburg, Avenue Patrice Lumumba, and Second Nature. Anchored in photojournalism but working against the grain of spectacle, Tillim portrays the communities, social landscapes and symbolic structures of societies altered by conflict. From explorations of modernist architecture and its utopian ruins in post-colonial Angola, Congo and Mozambique, to the homes and private lives of Johannesburg's inner-city residents, Tillim's work raises timely questions about the politics and representation of the built environment.

2020-10-12 Ann Casement This groundbreaking book was seeded by the first-ever joint Jung-Lacan conference on the notion of the sublime held at Cambridge, England, against the backdrop of the 100th

anniversary of the outbreak of the Great War. It provides a fascinating range of in-depth psychological perspectives on aspects of creativity and destruction inherent in the monstrous, awe-inspiring sublime. The chapters include some of the outcrop of academic and clinical papers given at this conference, with the addition of new contributions that explore similarities and differences between Jungian and Lacanian thinking on key topics such as language and linguistics, literature, religion, self and subject, science, mathematics and philosophy. The overall objective of this vitalizing volume is the development and dissemination of new ideas that will be of interest to practising psychoanalysts, psychotherapists and academics in the field, as well as to all those who are captivated by the still-revolutionary thinking of Jung and Lacan.

2020-11-13 Julius Evola Originally published in 1932, bringing together essays that appeared in previous years, and then reprinted in 1949 and 1971 with updates, this book, so far from its first appearance, is of a shocking topicality, such that it can still be used today as a manual for orientation in the Babelic "contemporary spiritualism" of the modern world and to avoid its traps.

2014-09-04 Caleb Scharf Though the concept of "the universe" suggests the containment of everything, the latest ideas in cosmology hint that our universe may be just one of a multitude of others—a single slice of an infinity of parallel realities. In *The Copernicus Complex*, the renowned astrophysicist and author Caleb Scharf takes us on a cosmic adventure like no other, from tiny microbes within the Earth to distant exoplanets and beyond, asserting that the age-old Copernican principle is in need of updating. As Scharf argues, when Copernicus proposed that the Earth was not the fixed point at the center of the known universe (and therefore we are not unique), he set in motion a colossal scientific juggernaut, forever changing our vision of nature. But the principle has never been entirely true—we do live at a particular time, in a particular location, under particular circumstances. To solve this conundrum we must put aside our Copernican worldview and embrace the possibility that we are in a delicate balance between mediocrity and significance, order and chaos. Weaving together cutting-edge science and classic storytelling, historical accounts and speculations on what the future holds, *The Copernicus Complex* presents a compelling argument for what our true cosmic status is, and proposes a way forward for the ultimate quest: to determine life's abundance not just across this universe but across all realities.

1969 K'uan Yü Lu *The Secrets of Chinese Meditation* is a classic text that presents a rare opportunity: a chance to study the ancient and original sources which are the basis for most contemporary texts on consciousness development. Lu K'uaan Yu is one of the foremost interpreters of Chinese meditation practices. This concise volume is a presentation of different methods of meditation as practiced in China, including extracts from ancient and modern classics as well as practiced and detailed suggestions for meditation. Meditation is crucial for the development of consciousness, and the Taoist art of controlling the breath is a prerequisite for training in the martial arts. *The Secrets of Chinese Meditation* provides students with practical instructions for controlling the breath and calming the mind—the foundation of self-realization. The way to consciousness will be different for all individuals. This classic work is a source book that encourages you to knowledgeably choose the way most useful to your chosen path.

1998-11-30 Irad Malkin This remarkably rich and multifaceted study of early Greek exploration makes an original contribution to current discussions of the encounters between Greeks and non-Greeks. Focusing in particular on myths about Odysseus and other heroes who visited foreign lands on their mythical voyages homeward after the Trojan War, Irad Malkin shows how these stories functioned to mediate encounters and conceptualize ethnicity and identity during the Archaic and Classical periods. Synthesizing a wide range of archaeological, mythological, and literary sources, this exceptionally learned book strengthens our understanding of early Greek exploration and city-founding along the coasts of the Western Mediterranean, reconceptualizes the role of myth in ancient societies, and revitalizes our understanding of ethnicity in

antiquity. Malkin shows how the figure of Odysseus became a proto-colonial hero whose influence transcended the Greek-speaking world. The return-myths constituted a generative mythology, giving rise to oral poems, stories, iconographic imagery, rituals, historiographical interpretation, and the articulation of ethnic identities. Reassessing the role of Homer and alternative return-myths, the book argues for the active historical function of myth and collective representations and traces their changing roles through a spectrum of colonial perceptions—from the proto-colonial, through justifications of expansion and annexation, and up to decolonization.

1999 Guglielmo Petroni The author's tale of being arrested in Rome on May 3, 1944, and of the following thirty-three days of beatings, interrogations, and transfers from one prison to the next, is one of "survival and growth, an account of his experiences and a meditation on their meaning for himself, for his compatriots, and for an entire country."--Cover.

2009 Eric Kurlander This book addresses key questions about liberal democrats and their activities in Germany from 1933 to the end of the Nazi regime. While it is commonly assumed that liberals fled their homeland at the first sign of jackboots, in reality most stayed. Some even thrived under Hitler, personally as well as professionally. Historian Eric Kurlander examines the motivations, hopes, and fears of liberal democrats--Germans who best exemplified the middle-class progressivism of the Weimar Republic--to discover why so few resisted and so many embraced elements of the Third Reich. German liberalism was not only the opponent and victim of National Socialism, Kurlander suggests, but in some ways its ideological and sociological antecedent. That liberalism could be both has crucial implications for understanding the genesis of authoritarian regimes everywhere. Indeed, Weimar democrats' prolonged reluctance to oppose the regime demonstrates how easily a liberal democracy may gradually succumb to fascism.

2005 Aneesha L Dillon This book celebrates Aneesha's thirty years of experience working with neo-Reichian methods of energy release, combined with meditation. It contains both theoretical and descriptive information about her work with people, which she calls Pulsation, and also traces the development of a new branch of her work, Tantric Pulsation. Aneesha's book, "Tantric Pulsation," is rooted in the insights of two of the most controversial figures of the twentieth century, Wilhelm Reich and Osho Rajneesh. Reich was a disciple of Sigmund Freud, the founder of modern psychology. Reich agreed with Freud that sexual repression lies at the root of psychological neurosis, and went on to state that even ordinary, normal human beings are incapable of enjoying their lives because of widespread sexual and emotional repression practiced by all civilized societies. Reich found that the physical body stores these repressed energies as tension in the muscles, which he called "muscular armoring." He developed a system which uses breathing and body movement to release this tension, including strong emotional expression. This, in turn, allows energy to flow freely and naturally throughout the whole body, inducing a physical state of tremendous aliveness, together with feelings of relaxation and well-being. Osho Rajneesh, an Indian mystic considered by many a modern Tantra master, also works with life energy through his extraordinary and transforming Active meditations. His Tantra vision, wholly life affirmative, is rooted in acceptance, let-go, meditation, and celebration of life. This is a vision which embraces all human experience, from sex to superconsciousness. Aneesha's methods have grown from these two streams of understanding, one western, one eastern. The result is a unique process of self experience and transformation, both delightful and profound.
