Organizational Effectiveness: A Comparison of Multiple Models directly addresses the issues of non-integration and non-comparability. This book not only provides well thought out approaches to effectiveness as a construct, but also practical suggestions for improving effectiveness in organizations. A set of integrating questions that raise theoretical, conceptual, empirical, research, practical, and managerial issues are also included. This text likewise compares and contrasts theoretical and philosophical roots of a particular perspective with other perspectives. This publication is intended for scholars and researchers seeking to understand and measure organizational effectiveness, as well as practitioners who are faced with the problem of managing and improving their own organization's effectiveness.

The Medical Mandarins 1995 George Weisz This wide-ranging and imaginative book examines the social and scientific role of the French Academy of Medicine from its creation in 1820 to the outbreak of the Second World War. The first chapters focus on the institution and its activities, including the evaluation of medical innovations and the cultivation of professional memory through eulogies and institutional art. Weisz argues that the Academy was gradually transformed from a low-status public institution that was central to French medical science in the nineteenth century to an "establishment" institution largely irrelevant to medical science but playing a key role in public health policy. The second

half of the book uses the activities and literary productions of the Academy to explore broader issues of medical history. The Academy's role in the regulation and scientific study of mineral waters illuminates processes of discipline formation in medical science and explores the therapeutic specificity of French medicine. Academic debates are used to investigate the appropriation of new research techniques like animal experimentation and quantification in therapeutic reasoning. Academic eulogies provide a starting point for the evolving medical and scientific reputation of Laennec, the inventor of auscultation, Using techniques of prosopography applied to the membership of the Academy, Weisz goes on to analyze the role of the Parisian medical elite in French medicine and its social place within the French bourgeoisie. His concluding chapter examines the emerging self-images of this Parisian elite in academic eulogies.

**The Shape of Things To Come (Science Fiction Classic)** 2024-01-05 H. G. Wells This carefully crafted ebook: "The Shape of Things To Come (Science Fiction Classic)" is formatted for your eReader with a functional and detailed table of contents. The Shape of Things to Come is a work of science fiction, which speculates on future events from 1933 until the year 2106. In the book, a world state is established as the solution to humanity's problems. As a frame story, Wells claims that the book is his edited version of notes written by an eminent diplomat, Dr Philip Raven, who had been having dream visions of a history textbook published in 2106 and wrote down what he could remember of it. Herbert George

Wells (1866-1946), known as H. G. Wells, was a prolific English writer in many genres, including the novel, history, politics, and social commentary, and textbooks and rules for war games.

*Education and the French Revolution* 2009-02-12 H. C. Barnard The French Revolution was the first of the great social upheavals which transformed European society; its effects on the French national educational system and its wider influence on education is obviously important. Little has been written on the topic and Professor Barnard offers a modern study. He begins with a survey of the educational system under the Ancien Régime and describes the criticisms and schemes of reform which had already been offered before the Revolution. Then follow accounts of the educational activities of the revolutionary assemblies and the individual institutions set up during the period. The story ends with an account of the lasting influence of these reforms. Throughout, Professor Barnard emphasises the importance of the concept of education as a fundamental civic right and the duty of the state to provide and regulate it. The book gives the student of the history of education, of social history and modern France a useful survey of a central topic.

**A Treatise on Political Economy** 2011 Antoine Louis Claude Destutt de Tracy (conde) "A Treatise on Political Economy" by Antonie Louis Claude Destutt de Tracy (1754-1836) is a foundational text of nineteenth-century, free-market economic thought and remains one of the classics of nineteenth-century French economic liberalism. Destutt de Tracy was one of the founders of the classical liberal republican group known as the Ideologues, which included Benjamin Constant, Jean-Baptiste Say, Marquis de Condorcet, and Madame de Stael. In this volume, Destutt de Tracy provides one of the clearest statements of the economic principles of the Ideologues. Breaking with the physiocratic orthodoxy of the eighteenth century, Destutt de Tracy denies that land is the source of all productive labor and focuses his attention upon manufacturing and manufacturers as the producers of utility and, therefore, of value and of

wealth. Placing the entrepreneur at the center of his view of economic activity, he argues against luxurious consumption of the idle rich and recommends a market economy with low taxation and minimum state intervention. Destutt de Tracy sent the text of "A Treatise on Political Economy" to Thomas Jefferson in hopes of securing its translation in the United States. It was met with enthusiastic approval. Jefferson wrote to the publisher, "The merit of this work will, I hope, place it in the hands of every reader in our country." Jeremy Jennings is Professor of Political Theory at Queen Mary, University of London."

**The Council of Europe French-English Legal Dictionary** 1994-01-01 F. H. S. Bridge Designed to provide really usable, authentic translations, the new Council of Europe French-English Legal Dictionary is unusually comprehensive both in geographical range (Belgian, Luxembourg & Swiss terms are included) & in subject-matter, giving idiomatic English equivalents of countless terms unobtainable or inaccurately translated elsewhere; non-legal terminology has been rigorously excluded. The result is an incomparable reference work containing some 11 000 entries, clearly set out & easy to consult.

**Greek Wisdom Literature and the Middle Ages** 2009 Francisco Rodríguez Adrados In 13th-century Toledo, King Alfonso the Wise fostered the publication of Castilian translations of certain Arabic works that had in turn been translated from Greek and Pehlvi. In this book, which is the revised English version of the Spanish original published under the title of Modelos griegos de la sabiduría castellana y europea, the author studies four of these Castilian translations - the Libro de los Buenos Proverbios, Poridad de las Poridades or Secreto de secretos, Bocados de Oro and Historia de la Donzella Teodor - works of sapiential literature that had an enormous influence in all of Europe. Their Arabic models had been translated from Greek in Bagdad at the instigation of the great caliphs of the 9th century and also in the Fatamid court at Cairo in the 11th century. The traditional view is that this literature is simply of oriental origin, but the author believes that the models were

Greek Byzantine works discovered by the Arabs in Syria and Egypt in the 7th and 8th centuries. Their true origin is to be found in the Greek sapiential literature that developed around the figures of Socrates, Plato, Aristotle and Alexander in the Hellenistic, Roman and Byzantine schools of philosophy; its influence can frequently be found reflected in authors of Christian literature. A detailed study of themes, vocabulary and expressions in the works themselves confirms these origins.

**Sacrifice** 1981-12-15 Henri Hubert Marcel Mauss was the nephew and most distinguished pupil of mile Durkheim, whose review L'Ann e sociologique he helped to found and edit. Henri Hubert was another

member of the group of sociologists who developed under the influence of Durkheim. The present book is one of the best-known essays pulbished in L'Ann e sociologique and has been regarded as a model for method and mode of interpretation. Its subject is at the very center of the comparative study of religion. The authors describe a basic sacrifice drawn from Indian sources and show what is fundamental and constant, comparing Indian and Hebrew practices in particular, then Greek and Roman, then additional practices from many eras and cultures.
