*Green Criminology* 2014-02-03

Rob White Over the past ten years, the study of environmental harm and 'crimes against nature' has become an increasingly popular area of research amongst criminologists. This book represents the first international, comprehensive and introductory text for green criminology, offering a concise exposition of theory and concepts and providing extensive geographical coverage, diversity and depth to the many issues pertaining to environmental harm and crime. Divided into three sections, the book draws on a range of international case studies and examples, and looks at the conceptual and methodological foundations of green criminology, before examining in detail areas of environmental crime and harm, and how they are addressed, including: climate change and social conflict; abuse and harm to animals; threats to biodiversity; pollution and toxic waste; environmental victims; environmental regulation, law enforcement and courts; environmental forensic studies; environmental crime

prevention. Green Criminology is packed with pedagogical features, including dialogue boxes, case examples, discussion questions and lists of further reading and is perfect for students around the world engaged with green criminology and crime against the environment.

Competency-based Resumes 2005-01-01 Robin Kessler This book shows today's job

candidates a new, more targeted way to write resumes to get them back on the same playing field with the best employers and improve their odds of winning the job they want. The system an employer uses when filling jobs has changed significantly in the past few years, and it is still evolving. Rather than simply looking at an applicant's past jobs, companies are instead looking at candidate's experiences in certain key areas including measurable work habits and the personal skills, known as competencies, used to achieve objectives at work. Competency-Based Resumes offers you a new and effective way to create resumes that emphasize the knowledge, skills, and abilities that you have and employers need.
