2014-04-08 Solomon Northup Kidnapped and sold into slavery in the American South, freeman Solomon Northup

spent twelve years in bondage before being freed. Twelve Years a Slave is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's Uncle Tom's Cabin, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.  
2016-09-01 Michel Foucault Three decades after his death, Michel Foucault remains one of the towering intellectual figures of the last half-century. His works on sexuality, madness, the prison, and medicine are enduring classics. From 1971 until his death in 1984, Foucault gave public lectures at the famous Collège de France. These seminal events, attended by thousands, created the benchmarks for contemporary social enquiry. The lectures comprising Abnormal begin by examining the role of psychiatry in modern criminal justice, and its

method of categorising individuals who "resemble their crime before they commit it." Building on the themes of societal self-defence developed in earlier works, Foucault shows how defining "normality" became a prerogative of power in the nineteenth century, shaping the institutions-from the prisons to the family-meant to deal with "monstrosity," whether sexual, physical, or spiritual. The Collège de France lectures add immeasurably to our appreciation and understanding of Foucault's thought.

1893  
2011-02-08 L. Whaley Women have engaged in healing from the beginning of history, often within the context of the home. This book studies the role, contributions and challenges faced by women healers in France, Spain, Italy and England, including medical practice among women in the Jewish and Muslim communities, from the later Middle Ages to approximately 1800.  
1888 Guillaume Louis Gustave Belèze  
1862 Guillaume Belèze  
2007 Lissa Roberts Although manual labour and theoretical invention might now seem separate ventures, history

teaches us that they are closely linked processes. The Mindful Hand explores innovative areas of European society between the late Renaissance and the period of early industrialisation where the enterprise of knowledge and production relied on the most intimate connexions of thought and toil. This volume explains how philosophers and labourers collaborated in an environment where artisans and instrument-makers, administrators and entrepreneurs simultaneously pioneered technical change alongside knowledge formation. The essays gathered here help show how these projects were pursued together, yet why, in retrospect, the very categories of science and technology emerged as seemingly distinct endeavors.

1967 Gilbert Perez

2021-04-30 Sander Govaerts  
Using the ecosystem concept as his starting point, the author examines the complex relationship between premodern armed forces and their environment at three levels: landscapes, living beings, and diseases. The study focuses on Europe's Meuse Region, well-known among historians of war as a battleground between France and Germany. By analyzing soldiers' long-term interactions with nature, this book engages with current debates about the ecological impact of the military, and provides new impetus for contemporary armed forces to make greater effort to reduce their environmental footprint.

1984 Jacques Derrida An

analysis of the works of the French poet, Francis Ponge, explores a new technique for reading poetry  
2019-09-11 World Intellectual Property Organization This Guide is primarily intended for applicants and holders of international registrations of marks, as well as officials of the competent administrations of the Member States of the Madrid Union. It leads them through the various steps of the international registration procedure and explains the essential provisions of the Madrid Agreement, the Madrid Protocol and the Common Regulations.

1985 Olive R. Jones

Archaeologists and curators working on military sites have to address the problems of what kinds of objects were used by officers and men, how and when they were used and whether they were privately owned or supplied by the military. To help both these groups and for the interest of the general public an illustrated catalogue of glassware used by the British military in Canada from ca. 1755 to 1820 was compiled. The catalogue focusses on the Seven Years' War (1756-63), the American Revolution (1776-83) and the War of 1812-14. Categories used include drinking by type of beverage, storage and serving vessels, drinking glasses, wine glass coolers and finger glasses; eating vessels for condiments, serving vessels and desserts; canteens; health and personal care; and lighting. Material on ownership, sources of supply, and details on

production are also included.

Implementing the Nagoya Protocol compares existing ABS regimes in ten European countries, including one non-EU member and one EU candidate country, and critically explores several cross-cutting issues related to the implementation of the Nagoya Protocol in the EU.  
2018-05-26 Stefano Biagetti  
This volume focuses on the intangible elements of human cultures, whose relevance in the study of archaeology has often been claimed but rarely practiced. In this book, the authors successfully show how the adoption of ethnoarchaeological perspectives on non-material aspects of cultures can support the development of methodologies aimed at refining the archaeological interpretation of ancient items, technologies, rituals, settlements and even landscape. The volume includes a series of new approaches that can foster the dialogue between archaeology and anthropology in the domain of the intangible knowledge of rural and urban communities. The role of ethnoarchaeology in the study of the intangible heritage is so far largely underexplored, and there is a considerable lack of ethnoarchaeological studies explicitly focused on the less tangible evidence of present and past societies. Fresh case studies will revitalize the theoretical debate around ethnoarchaeology and its applicability in the

archaeological and heritage research in the new millennium. Over the past decade, 'intangible' has become a key word in anthropological research and in heritage management. Archaeological theories and methods regarding the explorations of the meaning and the significance of artifacts, resources, and settlement patterns are increasingly focusing on non-material evidence. Due to its peculiar characteristics, ethnoarchaeology can effectively foster the development of the study of the intangible cultural heritage of living societies, and highlight its relevance to the study of those of the past.

2018-02-28 Michael Lynn In this book, Michael R. Lynn analyses the popularisation of science in Enlightenment France. He examines the content of popular science, the methods of dissemination, the status of the popularisers and the audience, and the settings for dissemination and appropriation. Lynn introduces individuals like Jean-Antoine Nollet, who made a career out of applying electric shocks to people, and Perrin, who used his talented dog to lure customers to his physics show. He also examines scientifically oriented clubs like Jean-François Pilâtre de Rozier's Musée de Monsieur which provided locations for people interested in science.

Phenomena such as divining rods, used to find water and ores as well as to solve crimes; and balloons, the most spectacular of all types of

popular science, demonstrate how people made use of their new knowledge. Lynn's study provides a clearer understanding of the role played by science in the Republic of Letters and the participation of the general population in the formation of public opinion on scientific matters.

2020-10-16 Mike Healy This book explores the fundamental contradiction at the heart of the digital environment: technology offers all manner of promises, yet habitually fails to deliver. This failure often arises from numerous problems: the proficiency of the technology or end-user, policy failure at various levels, or a combination of these. Solutions such as better technology and more effective end-user education are often put into place to solve these failures. Mike Healy argues that such approaches are inherently faulty drawing upon qualitative research informed by Marx's theory of alienation. Using Marx's theory, he considers participants in three distinct settings: the workplace of information and communications technology (ICT) professionals; university scholars researching the ethical and societal implications of our digital environment; and a group of pensioners living in South London, UK, undertaking ICT training. By delving beneath the surface of how digital technologies are created, researched and experienced, this study illustrates the contradictory nature of our digital lives, as they directly

arise from the needs of capitalism. The book also places Marx's theory in contrast to the mainstream approaches derived from Seaman and Blauner. In researching and comprehending ICT, this book reaffirms the superior explanatory power of Marx's theory of alienation.

2016-03-05 Harry Owen Simulation in healthcare education has a long history, yet in many ways, we have been reinventing the wheel during the last 25 years. Historically, simulators have been much more than simple models, and we can still learn from aspects of simulation used hundreds of years ago. This book gives a narrative history of the development of simulators from the early 1700s to the middle of the 20th century when simulation in healthcare appeared to all but die out. It is organized around the development of simulation in different countries and includes at the end a guide to simulators in museums and private collections throughout the world. The aim is to increase understanding of simulation in the professional education of healthcare providers by exploring the historical context of simulators that were developed in the past, what they looked like, how they were used, and examples of simulator use that led to significant harm and an erosion of standards. The book is addressed to the healthcare simulation community and

historians of medicine. The latter in particular will appreciate the identification and use of historic sources written in Latin, German, Italian, French, Polish and Spanish as well as English.

2017-08-03 Stephen Blackmore  
This book focuses on global efforts to protect plant diversity and the role that botanic gardens play in conserving plant species.

2003-09-01 Lynn Stafford-Yilmaz  
For ESL learners who need to communicate in typical workplace situations.

2018-07-24 Piotr Romanowski  
This book covers research topics in bilingual education, language policies, language contact, identity of bilingual speakers, early bilingualism, heritage languages, and more, and provides an overview of current theory, research and practice in the field of bilingualism. Each chapter is written by a specialist in the field. Part I focuses on the numerous and heterogeneous relations between languages as well as the implications arising from bilingual speech processing. In Part II, a series of contextualized studies on bilingual classrooms are presented, with diverse research designs applied in different educational settings being a key feature of these studies. Part III bridges theory and practice by offering an insight into mono- and multilingual school settings showcasing examples of educational institutions where bilingualism successfully soared and depicts the needs related to language education.

Get seven times the language-learning expertise for the price of one book! Learning French is easier and more affordable than ever with this one-stop resource! More than a million students have turned to the Practice Makes Perfect series to build their language-learning skills. Now, you can get all the tools you need to learn French in one value-packed workbook. Practice Makes Perfect: Complete French All-in-One, 2nd Edition covers all facets of the French language and

provides you with a solid foundation of verbs, vocabulary and grammar, and conversational structures. Featuring seven separate books from the series in a single volume, this one-stop resource delivers everything you need to master French. You'll find hundreds of hands-on practice exercises to help you gain confidence when speaking in your new language. This premium second edition is supported by extensive audio recordings, streaming via the McGraw-Hill Language Lab app, as well as online flashcards sets for study on-the-go and a comprehensive index for quick reference to all grammar explanations in the book. The audio makes it easier than ever to hone your listening and speaking skills. Practice Makes Perfect: Complete French All-in-One, 2nd Edition features:

- Seven titles in one value-packed volume: Complete French Grammar; French Nouns and their Genders Up Close; French Vocabulary; French Sentence Builder; French Pronouns and Prepositions; French Verb Tenses; and French Conversation
- An integrated approach that lets you study at your own level and develop new language skills at your own pace
- New: Access to the McGraw-Hill Education Language Lab app, flashcards for all vocabulary lists throughout the book, and streaming audio recordings for many exercise answer keys

2006-01-01 Catherine Carstairs  
As rates of illegal drug use increase, the debates over drug

policy heat up. While some believe penalties should be harsher, others advocate complete decriminalisation. Certainly, debate over the 'war on drugs' is not new. In the early 1920s, as the drive for Chinese Exclusion gathered steam, Canadians blamed the Chinese for the growing use of opium and other drugs, and parliamentarians passed extremely harsh drug laws to counter this use. These laws remained in place until the 1960s. In *Jailed for Possession*, Catherine Carstairs examines the impact of these drug laws on users' health, work lives, and relationships. In the middle of the century, drug users regularly went to jail for up to two years for possession of even the smallest amount of opium, morphine, heroin, or cocaine, often spending more time incarcerated than on the street. As enforcement increased and drugs became harder to obtain, drug use became an increasingly central preoccupation, making it almost impossible for users to hold down steady jobs, support families, or maintain solid

relationships. *Jailed for Possession* is the first social history of drug use in Canada and provides a careful examination of drug users and their regulators including doctors, social workers, and police officers. 2019-10 Thomas Nelson Portable? Or readable? How about both. Even with its large, easy-to-read 10.5-point print size, the NET Thinline Large Print Bible is still slim enough to tuck into a backpack, a briefcase, or most purses. Featuring the New English Translation--the newest translation of the biblical languages into English, based on the most up-to-date manuscript discoveries and research--the NET Thinline Large Print is a Bible you can bring along wherever your day takes you. Features include: Complete text of the transparent and accurate New English Translation Abbreviated set of NET translators' notes Durable Smyth-sewn binding lays flat in your hand or on your desk Lightweight for easy travel

Full-color maps Exceptionally readable 10.5-point print size in Thomas Nelson NET Comfort Print(R) typeface 1967 Friedrich Hassaurek 1982 Walter Pagel A Karger 'Publishing Highlights 1890-2015' title This 2nd, revised edition is still the reference work available in print and electronically on Paracelsus by the Paracelsus authority. Furthermore, it makes a very good read. See also Pagel's last book *The Smiling Spleen on Paracelsianism* as a historical phenomenon. '...a work in the brilliant tradition of biographical research ... even the casual reader will be impressed to learn that, four centuries ago, the man who had the courage to burn in public the writings of Avicenna, recognised pulmonary disease in miners as an occupational hazard, cretinism and goitre as endemic in certain areas, and chorea and hysteria as manifestations of disease, not demonic possession.' *The Lancet* 1857 Heinrich Barth 2001
