2021-03 Elizabeth Andrews Bond Inspired by the reading and writing habits of citizens leading up to the French Revolution, *The Writing Public* is a compelling addition to the long-running debate on the link between the Enlightenment and the political struggle that followed. Elizabeth Andrews Bond scoured local newspapers throughout France for the two decades prior to the Revolution and the first three years of the Revolution, shining a light on the 'letters to the editor'. These letters were a form of early social media, constituting a lively and ongoing conversation amongst readers. Bond takes us beyond the glamorous salons of the intelligentsia, into the everyday worlds of craftsmen, clergy, farmers, and women, all of whom composed these letters. We thus get a fascinating glimpse into who participated in public discourse, what they most wanted to discuss, and how they shaped a climate of opinion. *The Writing Public* offers a novel examination of how French citizens used the information press to form norms of civic discourse and shape the experience of revolution. The result is a nuanced analysis of knowledge production during the practical Enlightenment.

2016-06-03 Hubertus Fischer This volume focuses on the outstanding contributions made by botany and the mathematical sciences to the genesis and development of early modern garden art and garden culture. The many facets of the mathematical sciences and botany point to the increasingly "scientific" approach that was being adopted in and applied to garden art and garden culture in the early modern period. This development was deeply embedded in the philosophical, religious, political, cultural and social contexts, running parallel to the beginning of processes of scientization so characteristic for modern European history. This volume strikingly shows how these various developments are intertwined in gardens for various purposes.

2018-02-20 François-René de Chateaubriand Written over the course of four decades, Francois-ReneÅL de Chateaubriand's epic autobiography has drawn the admiration of Baudelaire, Flaubert, Proust, Roland Barthes, Paul Auster, and W. G. Sebald. In this unabridged section of the Memoirs, spanning the years 1768 to 1800, Chateaubriand looks back on the already bygone world of his youth. He recounts the history of his aristocratic family and the first rumblings of the French Revolution. He recalls playing games on the

beaches of Saint-Malo, wandering in the woods near his father's castle in Combourg, hunting with King Louis XVI at Versailles, witnessing the first heads carried on pikes through the streets of Paris, meeting with George Washington in Philadelphia, and falling hopelessly in love with a young woman named Charlotte in the small Suffolk town of Bungay. The volume ends with Chateaubriand's return to France after eight years of exile in England. In this new edition (the first unabridged translation of any portion of the Memoirs to be published in more than a century), Chateaubriand emerges as a writer of great wit and clarity, a self-deprecating egoist whose meditations on the meaning of history, memory, and morality are leavened with a mixture of high whimsy and memorable gloom.

2021-04-20 Margaret Jacob

Provides a panoramic account of the radical ways that life began to change for ordinary people in the age of Locke, Voltaire, and Rousseau. In this book, familiar Enlightenment figures share places with voices that have remained largely unheard until now, from freethinkers and freemasons to French materialists, anticlerical Catholics, pantheists, pornographers, readers, and travelers. Jacob reveals how this newly secular outlook was not a wholesale rejection of Christianity but rather a new mental space in which to encounter the world on its own terms. She takes readers from London and Amsterdam to Berlin, Vienna, Turin, and Naples, drawing on rare archival materials to show how ideas central to the emergence of secular democracy touched all facets of daily life. Jacob demonstrates how secular values and

pursuits took hold of eighteenth-century Europe, spilled into the American colonies, and left their lasting imprint on the Western world for generations to come. -- Adapted from publisher description.

2012 Xiangming Chen Arguing that the focus in global urban studies on cities such as New York, London, Tokyo in the global North, Mexico City and Shanghai in the developing world, and other major nodes of the world economy, has skewed the concept of the global city toward economics, this volume gathers a diverse group of contributors to focus on smaller and less economically dominant cities. It highlights other important and relatively ignored themes such as cultural globalization, alternative geographies of the global, and the influence of deeper urban histories (particularly those relating to colonialism) in order to advance an alternative view of the global city.

2009-02-04 Jacques Le Goff In this ground-breaking new study, Jacques Le Goff, arguably the leading medievalist of his generation, presents his view of the primacy of the Middle Ages in the development of European history. "[A] superb and necessary book. This provocative assessment from a lifetime of scholarship might help us to place ourselves, not just territorially, but in that other precious element of history: time." The Guardian "A book that never fails to be informative, readable and provocative. Le Goff... has been the bravest and best of champions for medieval history. This book... is in every sense an inspiration." BBC History Magazine Praised by prominent figures in Europe and history including: Rt Hon Christopher Patten, CH, Former Member of the European Commission, and Neil Kinnock, Vice-President, European Commission.
