2006-09-28 Irene Cieraad In a volume that brings together a wide range of disciplines—art history, sociology, architecture, cultural anthropology, and environmental psychology—Irene Cieraad presents a collection of articles that focuses on the practices and symbolism of domestic space in Western society. These essays go beyond the discussion of conventional issues such as aesthetics and social standing. At Home takes an in-depth anthropological look at how different cultures use their homes as a visual model of the culture's social structure.

2008-02-01 Hollows, Joanne This wide-ranging text challenges a range of ideas about domestic culture. It examines how the meanings of domestic life are produced across a range of discourses and practices, from architecture, lifestyle media and advertising to home decoration, cooking and watching television.

2013-06-29 Irwin Altman The present volume in the series focuses on homes, residences, and dwellings. Although many fields have had a long-standing interest in different aspects of home environments, the topic has recently come to the forefront in the interdisciplinary environment

and behavior field. Researchers and theorists from many disciplines have begun to meet regularly, share ideas and perspectives, and move the investigation of psychological, social, and behavioral aspects of home environments to the central arena of environment and behavior studies. This volume representative-though not comprehensive attempts to provide a sampling of contemporary perspectives on the study of home environments. As in previous volumes, the authors are drawn from a variety of disciplines, including environmental design fields of architecture and planning, and from the social science fields of psychology, sociology, anthropology, and history. This diversity of authors and perspectives makes salient the principle that the study of homes in relation to behavior requires the contributions of many disciplines. Moreover, the chapters in this volume reflect an array of research and theoretical view points, different scales of home environments (e.g., objects and areas, the home as a whole, the home as embedded in neighborhood and communities, etc.), design and policy issues, and, necessarily, a comparative and cross-cultural perspective. Home environments are at the core of human life in most cultures, and it

is hoped that the contributions to this volume display the excitement, potential, and importance of research and theory on homes.

2000-07-20 Jeremy F. Lane This study of the work of the influential French sociologist and anthropologist Pierre Bourdieu places his work firmly in the context of developments both in the French post-war intellectual field and in post-war French society as a whole. Set against the background of rapid change and upheaval that has characterised post-war French society, culture and politics, Bourdieu's work can be seen as offering a peculiarly perceptive analysis of France's problematic transition to an era of late capitalism. Proceeding thematically, this study traces the development of Bourdieu's thought, elucidating the relationship between the anthropological and sociological aspects of his work, examining his debt to Marx, Weber, Durkheim, Husserl, Merleau-Ponty and Bachelard, and highlighting his antagonistic relationship with a series of contemporary intellectual figures and movements - Barthes, Lefebvre, Touraine, Sartre, Fanon, Foucault, Derrida, structuralism and post-structuralism.

2005 Professor of Architectural Theory Hilde Heynen A series of essays to challenge and stimulate, examining the links between gender, domesticity and architecture from a number of different perspectives and disciplines.

2005-06-27 Louise Archer Working class groups have historically been excluded from participation in higher education. Past decades have seen an expansion of the system towards a more inclusive higher education, but participation among people from working class groups has remained persistently low. Is higher education unattractive for these groups or are the institutions acting to exclude them? This thought-provoking and revealing book examines the many factors and reasons why working class groups are under-represented in higher education. In particular, the book addresses issues around differential access to information about university, the value of higher education to working class groups, the costs of participating and the propensity to participate. Issues of gender and ethnicity are also explored and questions are raised for those who are currently involved in 'widening participation' projects and initiatives. A unique feature of the book is that its findings are drawn from an innovative study where the views of both working class participants and non-participants in higher education were explored. This book will be of interest to students of social policy, educational studies and sociology of education at undergraduate and postgraduate level. Academics, researchers and policy makers nationally and internationally will also find it valuable.

2007-12-17 Brenda Morgan-Klein This textbook gives a wide-ranging, research-informed introduction to issues in lifelong learning across a variety of educational settings and practices. Its very accessible approach is multi-disciplinary drawing on sociology and psychology in particular. In addition, issues are discussed within an international

context. While there has been a proliferation of texts focussing on particular areas of practice such as higher education, there is little in the way of a broad overview. Chapters one to four introduce various conceptions of lifelong learning, the factors that impinge on learning through the life course, and the social and the economic rationale for lifelong learning. Chapters five-ten consider the varied sites of lifelong learning, from the micro to macro (from the home to the region to the virtual). Chapter eleven draws the strands together in the context of turbulence and continuing transition in personal and work roles, and against the background of future technological development. This timely overview will be relevant to education and training professionals, education studies students and the general reader.

2021-02-01 Johan Franzon Song Translation: Lyrics in Contexts grew out of a project dedicated to the translation of song lyrics. The book aligns itself with the tradition of descriptive translation studies. Its authors, scholars from Finland, Great Britain, Greece, Italy, Norway and Sweden, all deal with the translation of song lyrics in a great variety of different contexts, including music and performance settings, (inter)cultural perspectives, and historical backgrounds. On the one hand, the analyses demonstrate the breadth and diversity of the concept of translation itself, on the other they show how different contexts set up conditions that shape translational practices and products in different ways. The book is intended for translation studies scholars as well as for musicologists, students of language and/or music and practicing translators; in short, anybody interested in this creative and fascinating field of translational practice.

2008-03-04 Stephen P. Osborne The role of the Third Sector within European society is an extremely topical subject, as both governments and the EU continue to consider the role these organizations can play in providing essential public services. This book presents contemporary research into this emerging area, exploring the contribution of this important sector to European society as well as the key challenges that the sector and its component organizations face in making this contribution. This volume brings together for the first time a range of challenging perspectives upon the role and import of the Third Sector for European society from a variety of disciplines - including economics, sociology, political science, management and public policy. Areas covered include the Third Sector civil society and democracy, relationships with government, its impact on social and public policy, the growth of social enterprise and of hybrid organizations as key elements of the sector and the future challenges for the sector in Europe.

2017-01-31 Barbara Kożuch The faces of contemporary management relate to a vast range of methods directed at ensuring effectiveness in the functioning of organizations. This book discusses current research trends in management science in human resource management, corporate social responsibility, and contemporary management methods. The study concerns both the theory and practice of contemporary management.

2016-03-31 Jerry Brotton In 1570, when it became clear she would never be gathered into the Catholic fold, Elizabeth I was excommunicated by the Pope. On the principle that 'my enemy's enemy is my friend', this marked the beginning of an extraordinary English alignment with the Muslim powers who were fighting Catholic Spain in the Mediterranean, and of cultural, economic and political exchanges with the Islamic world of a depth not experienced again until the modern age. England signed treaties with the Ottoman Porte, received ambassadors from the kings of Morocco and shipped munitions to Marrakesh. By the late 1580s hundreds, perhaps thousands, of Elizabethan merchants, diplomats, sailors, artisans and privateers were plying their trade from Morocco to Persia. They included the resourceful mercer Anthony Jenkinson who met both Süleyman the Magnificent and the Persian Shah Tahmasp in the 1560s, William Harborne, the Norfolk merchant who became the first English ambassador to the Ottoman court in 1582 and the adventurer Sir Anthony Sherley, who spent much of 1600 at the court of Shah Abbas the Great. The previous year, remarkably, Elizabeth sent the Lancastrian blacksmith Thomas Dallam to the Ottoman capital to play his clockwork organ in front of Sultan Mehmed. The awareness of Islam which these Englishmen brought home found its way into many of the great cultural productions of the day, including most famously Marlowe's Tamburlaine,

and Shakespeare's *Titus Andronicus* and *The Merchant of Venice*. The year after Dallam's expedition the Moroccan ambassador, Abd al-Wahid bin Mohammed al-Annuri, spent six months in London with his entourage. Shakespeare probably began to write *Othello* six months later. This *Orient Isle* shows that England's relations with the Muslim world were far more extensive, and often more amicable, than we have appreciated, and that their influence was felt across the political, commercial and domestic landscape of Elizabethan England. It is a startlingly unfamiliar picture of part of our national and international history.

2008 Edward Best This book in addition of being remarkable academic reading contributes, on the highest scholarly level, to the furthering of our understanding of performance of the EU institutions which is essential for practitioners and researchers in the midst of the institutional crisis. Dominik Vuleti, *Croatian International Relations Review* . . . an impressively detailed introduction to the institutions and committees that form the core frameworks of EU activities including the EU Parliament, the European Central Bank, and the effects of EU membership expansion. The *Institutions of the Enlarged European Union* is very strongly recommended as an addition to governmental and university library International Studies reference collections in general, and European Union Studies supplemental reading lists in particular. Midwest Book Review *The International Studies Shelf* This excellent book in the series of studies on EU reform and enlargement is not as dry as it first appears. . . The contributors outline the key changes as well as patterns of continuity in the institutional policies of the EU and their research which I feel will be highly beneficial to lawyers, economists and politicians. . . I found the book to be invaluable for postgraduate and advanced undergraduate students of EU politics and administrative science, as well as researchers, practitioners and journalists working in the fields of European studies more widely. Phillip Taylor, *The Barrister* This timely, comprehensive and authoritative study provides much food for thought for European policy makers, particularly in the current situation of uncertainty about the Lisbon Treaty. The authors basically upbeat findings that, despite the arrival of twelve new member states in one big bang and one after shock, it has been pretty much business as usual for the EU's institutions will comfort both those who worried about the EU's capacity to act in the absence of institutional reform and those who argued that such reform was unnecessary. But the editors identify a number of emerging dynamics that will be of concern to all who care about the Union's democratic future: increasing formalisation of meetings and procedures on the one hand, coupled with an increase in informal, pre-cooked deals on the other; increasing primacy of the administrative over the political; and a growing trend towards presidentialisation within the institutions, with continued efficiency requiring more emphasis on the *primus* than on the *pars*. The editors conclude that, while the European Union's institutional system continues to function and might even become more efficient, the price to be paid could further distance the Union from the citizens it seeks to serve. Martin Westlake, Secretary General, European Economic and Social Committee, Brussels, Belgium This volume reports a thorough appraisal of how the EU institutions have fared since the 2004 enlargement. In essence the answer is more of the same, with no evidence of gridlock. Business has been conducted in similar ways and at similar levels of output, helped by procedural adaptation. The new member states have slotted into the existing routines of the Union. Helen Wallace, European Institute, London School of Economics and Political Science, UK How have the main institutions and decision-making processes of the EU responded to the arrival of new member states? This book assesses the actual state of the EU institutions in the years after the 2004 enlargement, examining each of the main institutional actors as well as trends in legislative output, implementing measures and non-legislative approaches. The contributors outline the key changes as well as patterns of continuity in the institutional politics of the EU. The analysis finds that breakdown has been avoided by a combination of assimilation of the new member states and adaptation of the system, without any fundamental transformation of the institutions. Nonetheless, they conclude that it 2003-09-02 Stephen P. Osborne The voluntary and non-profit sector is an important and emerging feature of Japanese society. It is a response both to the changing nature of this society and to political and social trends that have encouraged the Japanese government to see this sector as a potential provider of public services. It is also part of the emergence of 'civil society' in Japan. This book explores the roots of the societal challenges that voluntary and non-profit organisations face in Japan and evaluates their future impact on Japanese society. Containing

contributions from leading researchers, internationally as well as from key practitioners from Japan, this book is essential reading for any student of Japanese studies or the international non-profit sector. 2017-01-12 Marvin Waschke Discover the most prevalent cyber threats against individual users of all kinds of computing devices. This book teaches you the defensive best practices and state-of-the-art tools available to you to repel each kind of threat. *Personal Cybersecurity* addresses the needs of individual users at work and at home. This book covers personal cybersecurity for all modes of personal computing whether on consumer-acquired or company-issued devices: desktop PCs, laptops, mobile devices, smart TVs, WiFi and Bluetooth peripherals, and IoT objects embedded with network-connected sensors. In all these modes, the frequency, intensity, and sophistication of cyberattacks that put individual users at risk are increasing in step with accelerating mutation rates of malware and cybercriminal delivery systems. Traditional anti-virus software and personal firewalls no longer suffice to guarantee personal security. Users who neglect to learn and adopt the new ways of protecting themselves in their work and private environments put themselves, their associates, and their companies at risk of inconvenience, violation, reputational damage, data corruption, data theft, system degradation, system destruction, financial harm, and criminal disaster. This book shows what actions to take to limit the harm and recover from the damage. Instead of laying down a code of "thou shalt not" rules that admit of too many exceptions and contingencies to be of much practical use, cloud expert Marvin Waschke equips you with the battlefield intelligence, strategic understanding, survival training, and proven tools you need to intelligently assess the security threats in your environment and most effectively secure yourself from attacks. Through instructive examples and scenarios, the author shows you how to adapt and apply best practices to your own particular circumstances, how to automate and routinize your personal cybersecurity, how to recognize security breaches and act swiftly to seal them, and how to recover losses and restore functionality when attacks succeed. *What You'll Learn* Discover how computer security works and what it can protect us from See how a typical hacker attack works Evaluate computer security threats to the individual user and corporate systems Identify the critical vulnerabilities of a computer connected to the Internet Manage your computer to reduce vulnerabilities to yourself and your employer Discover how the adoption of newer forms of biometric authentication affects you Stop your router and other online devices from being co-opted into disruptive denial of service attacks Who This Book Is For Proficient and technically knowledgeable computer users who are anxious about cybercrime and want to understand the technology behind both attack and defense but do not want to go so far as to become security experts. Some of this audience will be purely home users, but many will be executives, technical managers, developers, and members of IT departments who need to adopt personal practices for their own safety and the protection of corporate systems. Many will want to impart good cybersecurity practices to their colleagues. IT departments tasked with indoctrinating their users with good safety practices may use the book as training material.

2010-12-15 Peter Willetts Non-governmental organizations (NGOs) from Amnesty International and Oxfam to Greenpeace and Save the Children are now key players in global politics. This accessible and informative textbook provides a comprehensive overview of the significant role and increasing participation of NGOs in world politics. Peter Willetts examines the variety of different NGOs, their structure, membership and activities, and their complex relationship with social movements and civil society. He makes us aware that there are many more NGOs exercising influence in the United Nations system than the few famous ones. Conventional thinking is challenged in a radical manner on four questions: the extent of the engagement of NGOs in global policy-making; the status of NGOs within international law; the role of NGOs as crucial pioneers in the creation of the Internet; and the need to integrate NGOs within mainstream international relations theory. This is the definitive guide to this crucial area within international politics and should be required reading for students, NGO activists, and policy-makers.

2012-08-06 John A. Joule This expanded second edition provides a concise overview of the main principles and reactions of heterocyclic chemistry for undergraduate students studying chemistry and related courses. Using a successful and student-friendly "at a glance" approach, this book helps the student grasp the essence of heterocyclic chemistry, ensuring that they can confidently use that knowledge when required.

The chapters are thoroughly revised and updated with references to books and reviews; extra examples and student exercises with answers online; and color diagrams that emphasize exactly what is happening in the reaction chemistry depicted.

2014-07-25 Andrzej Piotr Wierzbicki The book expresses the conviction that the art of creating tools - Greek *techne* - changes its character together with the change of civilization epochs and co-determines such changes. This does not mean that tools typical for a civilization epoch determine it completely, but they change our way of perceiving and interpreting the world. There might have been many such epochs in the history of human civilization (much more than the three waves of agricultural, industrial and information civilization). This is expressed by the title *Technen* of the book, where *n* denotes a subsequent civilization epoch. During last fifty years we observed a decomposition of the old episteme (understood as a way of creating and interpreting knowledge characteristic for a given civilization epoch) of modernism, which was an episteme typical for industrial civilization. Today, the world is differently understood by the representatives of three different cultural spheres: of strict and natural sciences; of human and social sciences (especially by their part inclined towards postmodernism) and technical sciences that have a different episteme than even that of strict and natural sciences. Thus, we observe today not two cultures, but three different episteme. The book consists of four parts. First contains basic epistemological observations, second is devoted to selected elements of recent history of information technologies, third contains more detailed epistemological and general discussions, fourth specifies conclusions. The book is written from the cognitive perspective of technical sciences, with a full awareness - and discussion - of its differences from the cognitive perspective of strict sciences or human and social sciences. The main thesis of the book is that informational revolution will probably lead to a formation of a new episteme. The book includes discussions of many issues related to such general perspective, such as what is technology proper; what is intuition from a perspective of technology and of evolutionary naturalism; what are the reasons for and how large are the delays between a fundamental invention and its broad social utilization; what is the fundamental logical error (using paradoxes that are not real, only apparent) of the tradition of sceptical philosophy; what are rational foundations and examples of emergence of order out of chaos; whether civilization development based on two positive feedbacks between science, technology and the market might lead inevitably to a self-destruction of human civilization; etc.

1996 Michał Heller In the beginning of the 20th century, the methodological developments in physics led to a particular contention between neo-positivist empiricism and the scientific expansionism of the scientific method. This work demonstrates examples of how modern theology is influenced by the new physics.

2009-05-07 Maria José Botelho "Children's literature is a contested terrain, as is multicultural education. Taken together, they pose a formidable challenge to both classroom teachers and academics.... Rather than deny the inherent conflicts and tensions in the field, in *Critical Multicultural Analysis of Children's Literature: Mirrors, Windows, and Doors*, Maria José Botelho and Masha Kabakow Rudman confront, deconstruct, and reconstruct these terrains by proposing a reframing of the field.... Surely all of us - children, teachers, and academics - can benefit from this more expansive understanding of what it means to read books." Sonia Nieto, From the Foreword *Critical multicultural analysis provides a philosophical shift for teaching literature, constructing curriculum, and taking up issues of diversity and social justice. It problematizes children's literature, offers a way of reading power, explores the complex web of sociopolitical relations, and deconstructs taken-for-granted assumptions about language, meaning, reading, and literature: it is literary study as sociopolitical change. Bringing a critical lens to the study of multiculturalism in children's literature, this book prepares teachers, teacher educators, and researchers of children's literature to analyze the ideological dimensions of reading and studying literature. Each chapter includes recommendations for classroom application, classroom research, and further reading. Helpful end-of-book appendixes include a list of children's book awards, lists of publishers, diagrams of the power continuum and the theoretical framework of critical multicultural analysis, and lists of selected children's literature journals and online resources.*

2021 Günter Figal The *International Yearbook for Hermeneutics* represents one of the prominent currents in contemporary philosophy as well as in bordering disciplines. It gathers studies on questions

concerning understanding and interpretation in all relevant fields, including philosophy, theology, jurisprudence, theory of science as well as literary and cultural studies. The *Yearbook* includes contributions to current debates and on the history of ideas from antiquity to the present. This volume focusses on "Plurality."

2020-02-05 Elaine M. Boyle This textbook addresses the themes that are at the forefront of neonatal clinical care and research, based on natural divisions in care during pregnancy, and postnatally by gestational age at birth. The book offers a unique approach, in that it proposes discussion of important general principles underpinning neonatal care that are not addressed in most general neonatology textbooks, such as ethical issues, counselling, effective training methods, quality and safety, among other subjects. These are fundamental aspects and challenges that need to be appreciated by senior clinicians. A chapter authored by parents describing their perspectives of neonatal intensive care is unique and will be highly educational, with the potential to influence the way in which individuals view and deliver neonatal care. The authors discuss common and important conditions, to promote adoption of sound evidenced based practice where this is available. However, where evidence is limited, as is the case in many areas of neonatal practice, the authors aim to encourage critical thinking and evidence appraisal, which are necessary skills for busy clinicians wishing to filter evidence to guide delivery of care. This text is suitable for senior trainees wishing to pursue a career in neonatal medicine, early career neonatologists and paediatricians with an interest in neonatology. It is also of interest to established neonatologists wishing to update their neonatal knowledge. The content is based on the RCPCH Level 3 curriculum, and addresses important topical and/or controversial aspects of neonatal care.

2021-04 Poltorak JARON In an era of almost boundless individual opportunities, vulnerability, paradoxically, has gained significant attention. Undoubtedly this book significantly contributes to the debates on this very complex phenomenon, dealing with both the specific aspects of vulnerable individuals and groups' legal positions, as well as presenting the concept of vulnerability in international law. This book brings together scholars engaging with legal and actual positions of women, children and other vulnerable persons. Authors in detail discuss - among others - such issues as: political violence, motherhood in prison, age assessing of foreigners, infanticide or exclusion of the elderly. It will be of interest for academics in the fields of law and sociology, as well as vulnerability-oriented practitioners.

2018-05-09 David J. Gunkel 1. This extremely multidisciplinary book engages descriptive and prescriptive methods of study to video games, drawing heavily on philosophical traditions. It will have appeal outside of Film & Media and Philosophy to other areas of scholarly research including Sociology, Anthropology and Political Science. 2. The author is a senior scholar with extensive publications that explore the intersection of philosophy and ethics with digital games and reality. He has a strong presence on Facebook and Twitter as well as a well-designed personal website. He has historically been very engaged with his own digital and social media marketing for books he authors and plans to do the same for this title. 3. The author works to debunk and reframe what readers think they know about video games and digital culture, showing that it is wrong (or at least misguided) and that the important questions are often far more interesting and potentially disturbing than anticipated.

2009 Jeremy Kendall While scholarship on the social, economic and political contributions of organisations existing between the market and the state has proliferated in recent years, no sustained attention has previously been paid to how such organisations are collectively treated by, and respond to, public policy. The expert contributors examine the

policy environment for, and evolving policy treatment of, the third sector in the Czech Republic, France, Germany, Italy, Spain, Sweden, the Netherlands and the United Kingdom from a comparative perspective. They also look at how the third sector relates to multi-level European policy processes, including the Open Method of Co-ordination, the Community Method, nationally-led 'partnership' approaches within an overall EU framework and the United Nations International Year of Volunteering; an initiative implemented in the EU but originating externally.
