decisions every day. Each chapter of the text opens with a case study featuring a real business or real business situation, refers to the study throughout the Chapter, and concludes with An Inside Look—a news article format which illustrates how a key principle covered in the Chapter relates to real business situations or was used by a real company to make a real business decision.

Luxury and Wealth in Sparta and the Peloponnese 2022-10-01 Chrysanthi Gallou A Spartan lifestyle proverbially describes austerity; ancient Greek luxury was associated with Ionia and the oriental world. The

contributions to this book, first presented at a conference held by the University of Nottingham's Centre for Spartan and Peloponnesian Studies, reverse the stereotype and explore the role of luxury and wealth at Sparta and among its Peloponnesian neighbors from the Iron Age to the Hellenistic period. Using literary, archaeological, epigraphic and numismatic evidence, an international team of specialists investigates the definition and changing meanings of the term luxury and its nearest ancient Greek equivalents, providing new insights into Sparta's supposed abstention from luxury, and the way that this was portrayed by ancient writers. They analyse wealth production and private and public spending, emphasising features that were distinctive to Sparta and the Peloponnese compared with other parts of ancient Greece. Other chapters investigate issues still familiar in the contemporary world: economic crisis and debt, austerity measures, and relief provisions for the poor.

The Cambridge Economic History of Australia 2014-10-08 Simon Ville Australia's economic history is the story of the transformation of an indigenous economy and a small convict settlement into a nation of nearly 23 million people with advanced economic, social and political structures. It is a history of vast lands with rich, exploitable resources, of adversity in war, and of prosperity and nation building. It is also a history of human behaviour

and the institutions created to harness and govern human endeavour. This account provides a systematic and comprehensive treatment of the nation's economic foundations, growth, resilience and future, in an engaging, contemporary narrative. It examines key themes such as the centrality of land and its usage, the role of migrant human capital, the tension between development and the environment, and Australia's interaction with the international economy. Written by a team of eminent economic historians, *The Cambridge Economic History of Australia* is the definitive study of Australia's economic past and present.

Columbia Pictures 2021-10-19 Bernard F. Dick Drawing on previously untapped archival materials including letters, interviews, and more, Bernard F. Dick traces the history of Columbia Pictures, from its beginnings as the CBC Film Sales Company, through the regimes of Harry Cohn and his successors, and ending with a vivid portrait of today's corporate Hollywood. The book offers unique perspectives on the careers of Rita Hayworth and Judy Holliday, a discussion of Columbia's unique brands of screwball comedy and film noir, and analyses of such classics as *The Awful Truth*, *Born Yesterday*, and *From Here to Eternity*. Following the author's highly readable studio chronicle are fourteen original essays by leading film scholars that follow Columbia's emergence from Poverty Row status to world class, and the stars, films, genres, writers,

producers, and directors responsible for its transformation. A new essay on Quentin Tarantino's *Once Upon a Time...in Hollywood* rounds out the collection and brings this seminal studio history into the 21st century. Amply illustrated with film stills and photos of stars and studio heads, *Columbia Pictures* is the first book to integrate history with criticism of a single studio, and is ideal for film lovers and scholars alike.

Third-Party Certifiers 2019-07-12 Jan De Bruyne Third-Party Certifiers Jan De Bruyne Third-party certifiers are organisations that are independent a requesting entity. They attest that a product, service, information or person possesses certain qualifications or meets safety, quality or technical standards. This important book presents an in-depth analysis of the liability and obligations of certifiers, evaluates existing certification processes in selected fields and proposes new mechanisms which

could increase the accuracy and reliability of certifiers' ratings, marks or reports. Highlighting the risks of errors in this activity – inaccurate certification was a major factor in the global financial crisis of 2008 – the author takes a comparative approach, looking at the certification process in several European countries, Australia and the United States. Such aspects of the process as the following are thoroughly described: obligations and liability of certifiers during the certification process; risk of 'information asymmetry' between the requesting entity and the end user; and relationship between the civil liability of certifiers and public law aspects. The analysis includes detailed research on key industries and jurisdictions and a specific proposed framework for more accurate and reliable certification. Because the efficient and effective functioning of third-party certifiers is extremely important in today's world – especially in such areas as health, the environment, safety or economic values – this deeply researched contribution to an important area of

commercial law, combining analysis of current issues with proposed reforms, will be welcomed by practitioners when confronted with legal issues with regard to the certification process. The book's conceptual framework will also prove highly useful for policymakers charged with developing reliable certification mechanisms.

Making Economics Public 2023-05-22 Vicki Macknight Economics – macro, micro and mysterious – is integral to everyday life. But despite its importance for personal and collective decision making, it is a discipline often viewed as technical, arcane and inaccessible and thus overlooked in public discourse. This book is a call to arms to bring the discipline of economics more into the public domain. It calls on economists to think about how to make their knowledge of the economics public. And it calls on those who specialise in communicating expert knowledge to help us learn to communicate about economics. The

book brings together scholars and practitioners working at the early stages of an emerging field: the public communication of, and public engagement with, economics. Through a series of short essays from academics and practitioners, the book has two key goals: first and foremost, it will make a case for why we need to make economics public and for the importance of having a clear vision of what it means to make economics public. Secondly, it suggests some ways that this can be done featuring contributions from practitioners, including economists, who are engaging audiences in newspapers, museums and beyond. This book is essential reading for those in economics with an interest in making economics public and those already in the many fields dedicated to communicating expert knowledge in public spaces who have an interest in where economics can fit.
