2013-10-30 Hajo Greif A real book on ethics, as Wittgenstein had it, if one could conceive it in the first place, would be the book to destroy all other books. Yet there is an increasing number of real-world discourses in which ethical values are mobilized as justifications for socio-political action while, in turn, moral problems are becoming a topic of political negotiation. Although it will be difficult to find systematic accounts of an absolute good or of absolute values in these debates, it is equally difficult to imagine them not being deeply informed by such considerations. Rather than merely adding to the corpus of applied ethics on the one hand or remaining in seemingly Wittgensteinian silence about ethics on the other, many contributions to this volume explore the reach

of what can be said in ethical terms, while others provide critical discussions of what is being said in various fields of applied ethics and political philosophy under real-world power relations. This volume collects invited contributions from the 35th International Wittgenstein Symposium 2012 in Kirchberg am Wechsel, Austria. Authors include: Alice Crary, Peter Dabrock, Rom Harré, Agnes Heller, Jaakko Hintikka, Peter Koller, Anton Leist, Chantal Mouffe, Julian Nida-Rümelin, Hans Sluga, David Stern, Gianni Vattimo.

2013-10-07 Jürgen H.P. Hoffmeyer-Zlotnik This book explains harmonisation techniques that can be used in survey research to align national systems of categories and definitions in such a way that comparison is possible across countries and cultures. It provides an introduction to instruments for collecting internationally comparable data of interest to survey researchers. It shows how seven key demographic and socio-economic variables can be harmonised and employed in European comparative surveys. The seven key variables discussed in detail are: education, occupation, income, activity status, private household, ethnicity, and family. These demographic and socio-economic variables are background variables that no survey can do without. They frequently have the greatest explanatory capacity to analyse social structures, and are a mirror image of the way societies are organised nationally. This becomes readily apparent when one attempts, for example, to compare national education systems. Moreover, a comparison of the national definitions of concepts such as "private household" reveals several different historically and culturally shaped underlying concepts. Indeed, some European countries do not even have a word for "private household". Hence such national definitions and categories cannot simply be translated from one culture to another. They must be harmonised.

2010 Ulrich G. Leinsle With this book, distinguished historian of philosophy Ulrich Leinsle offers the first comprehensive introduction to scholastic theology -- a textbook for both Protestant and Catholic students.

2014-07-18 Terhi Ainiola The economy has an increasingly powerful role in the contemporary global world. Academic scholars who study names have recognised this, and, as such, onomastic research has expanded from personal and place names towards names that reflect the new commercial culture. Companies are aware of the significance of naming. Brand, product and company names play an important role in business. Culture produces names and names produce culture. Commercial names shape cultures, on the one hand, and changes in cultures may affect commercial names on the other. The world of the economy and business has created its own culture of names, but this naming culture may also affect other names; even place names and personal names are influenced by it. Names in the Economy: Cultural Prospects is composed of 20 articles that were produced from a collection of papers presented in 2012 at the fourth Names in the Economy symposium in Turku, Finland. These articles will equally be of interest to both academics and professionals. The goal of this book is multidisciplinary and theoretically diverse: it contemplates commercial-bound

names from the viewpoints of linguistics and onomastics, as well as marketing and branding research. In addition to traditional onomastic standpoints, there are newer linguistic theories, sociological and communicational views, multimodality theory, and branding theories. The authors are scholars from three continents and from ten different countries.

2012-04-19 Jakob Ebner Beiträge über die "Besonderheiten der deutschen Schriftsprache im Ausland" damit begonnen, die Landschaften der Hochsprache zu bearbeiten. Was Österreich betrifft, sind zwei ausführlichere Arbeiten zu erwähnen: H. Rizzo-Baur, "Die Besonderheiten der deutschen Schriftsprache in Österreich und Südtirol", Mannheim 1962 (Duden-Beiträge 5) und Z. Yalta, Prag, "Die österreichischen Prägungen im Wortbestand der deutschen Gegenwartssprache", 1967; dem Autor der letztgenannten Arbeit bin ich sehr zu Dank verpflichtet, daß ich das Manuskript seiner leider noch ungedruckten Arbeit einsehen durfte. Mannheim/Wien, im August 1969 Jakob Ebner Vorwort zur zweiten Auflage In der Neubearbeitung wurde der Wortschatz ergänzt und aktualisiert. Dazu wurde das neueste Schrifttum ausgewertet, einschließlich der Jugendliteratur. Über 700 Stichwörter wurden neu aufgenommen. Dies wurde durch platzsparenden Druck ermöglicht. Außerdem wurden Wörter der älteren Literatursprache und ältere Sachbezeichnungen sowie Wörter mit zu geringem Unterschied zum Sprachgebrauch in Deutschland gestrichen. Der allgemeine Teil am Schluß des Buches wurde durch eine Darstellung der österreichischen Umgangssprache und eine Suchliste Binnendeutsch-Österreichisch erweitert. Die vielen Anregungen und Korrekturvorschläge, die mich in den letzten zehn Jahren in Rezensionen und Briefen erreichten, bildeten eine wichtige Grundlage für die Neubearbeitung. Ich habe allen Benutzern und Kritikern der ersten Auflage für ihre Mitarbeit zu danken.

2001-01-01 Robert Stradling Produced for the Council of Europe project "Learning and teaching about the history of Europe in the 20th century", this book concentrates on the how rather than the what of teaching. Besides a study of selected themes and topics, it covers the teaching of sensitive issues, the reading of visual archives, analysing history on television and the Internet and assessing new technologies. Some of these new sources have not been made part of standard teacher training, yet they have a powerful role in the way young people perceive the past. The author is a Senior Research Fellow at Leirsinn Research Centre, University of Highlands and Islands Millennium Institute.

2011-07-20 Hermann Broch With his epic trilogy, *The Sleepwalkers*, Hermann Broch established himself as one of the great innovators of modern literature, a visionary writer-philosopher the equal of James Joyce, Thomas Mann, or Robert Musil. Even as he grounded his narratives in the intimate daily life of Germany, Broch was identifying the oceanic changes that would shortly sweep that life into the abyss. Whether he is writing about a neurotic army officer (*The Romantic*), a disgruntled bookkeeper and would-be assassin (*The Anarchist*), or an opportunistic war-deserter (*The Relicist*), Broch immerses himself in the twists of his characters' psyches, and at the same time soars above them, to produce a prophetic portrait of a world tormented by its loss of faith, morals, and reason.

2010-08-15 François Grosjean Whether in family life, social interactions, or business negotiations, half the people in the world speak more than one language every day. Yet many myths persist about bilingualism and bilinguals. In a lively and entertaining book, an international authority on bilingualism explores the many facets of life with two or more languages.

2016-09-26 Sebastian Knospe Wordplay involving several linguistic codes is an important modality of ludic language. This volume offers a multidisciplinary approach to the topic, discussing examples from different epochs, genres, and communicative situations. The contributions illustrate the multidimensionality, linguistic make-up, and the special interactive potential of wordplay across linguistic and cultural boundaries, including the challenging practice of translation.

2018-01-22 Sabine Arndt-Lappe The creation of new lexical units and patterns has been studied in different research frameworks, focusing on either system-internal or system-external aspects, from which no comprehensive view has emerged. The volume aims to fill this gap by studying dynamic processes in the lexicon – understood in a wide sense as not being necessarily limited to the word level – by bringing together approaches directed to morphological productivity as well as approaches analyzing general types of lexical innovation and the role of discourse-related factors. The papers deal with ongoing changes as well as with historical processes of change in different languages and reflect on patterns and specific subtypes of lexical innovation as well as on their external conditions and the speakers' motivations for innovating. Moreover, the diffusion and conventionalization of innovations will be addressed. In this way, the volume contributes to understanding the complex interplay of structural, cognitive and functional factors in the lexicon as a highly dynamic domain.

2013-11-18 Georg Kaiser *From Morning To Midnight*, among the most frequently performed German Expressionist works, charts the life of a cashier who steals money from the bank and flees to Berlin. The unnamed protagonist's bid to escape his middle-class daily life is ultimately frustrated. It is a popular piece in which Kaiser satirized the cheapness and futility of modern society. His hero, a kind of machine-age Everyman, searches

everywhere for some kind of fulfilment - in commercial sex, in salvationist religion - but discovers through a series of nightmarish episodes that the world is deceitful and illusory. In the end, disillusioned and pursued by the police, he takes his own life. This new version by Dennis Kelly, opened at the National Theatre's Lyttelton Theatre in November 2013, as part of the National's 50th Anniversary Season.

2010-03-24 Geoffrey Samuelsson-Brown This is the fifth revised edition of the best-selling *A Practical Guide for Translators*. It looks at the profession of translator on the basis of developments over the last few years and encourages both practitioners and buyers of translation services to view translation as a highly-qualified, skilled profession and not just a cost-led word mill. The book is intended principally for those who have little or no practical experience of translation in a commercial environment. It offers comprehensive advice on all aspects relevant to the would-be translator and, whilst intended mainly for those who wish to go freelance, it is also relevant to the staff translator as a guide to organisation of work and time. Advice is given on how to set up as a translator, from the purchase of equipment to the acquisition of clients. The process of translation is discussed from initial enquiry to delivery of the finished product. Hints are given on how to assess requirements, how to charge for work, how to research and use source material, and how to present the finished product. Guidance is given on where to obtain further advice and professional contacts. This revised edition updates practices in the translation profession and considers the impact of web-based translation offerings. Industry and commerce rely heavily on the skills of the human translator and his ability to make intellectual decisions that is, as yet, beyond the capacity of computer-aided translation.

2014-06-30 John M. Hoberman Across the modern political spectrum, left-wing and right-wing political theorists have invested sport with ideological significance. That significance, however, varies distinctively and characteristically with the ideology—a phenomenon John Hoberman terms "ideological differentiation." Taking this phenomenon as its point of departure, this provocative work interprets the major sport ideologies of the twentieth century as distinct expressions of political doctrine. Hoberman argues that a political ideology's interpretation of sport is shaped in part by the value it assigns to work and play as modes of experience; the political anthropologies of right and left can be distinguished by examining their resistance to—or affinity for—sportive imagery of their leaders and of the state itself; there exists a fascist temperament that shows an affinity to athleticism and the sphere of the body that is not shared by the left. Tracing modern sport ideology back to its premodern antecedents, Hoberman examines the interpretations of sport that have been promulgated by European political intellectuals, such as cultural conservatives and contemporary neo-Marxists, and by the official ideologists of Nazi Germany, the Soviet Union, the German Democratic Republic, and China before and after Mao. As a form of mass theater, sport can advertise any

ideology. But the deeper relationship between sport and political ideology has never before been explored with such vigor. Presenting the first general theory of sport and political ideology to appear in any language, Hoberman's groundbreaking work is a unique and invaluable contribution to the intellectual and political history of sport in the twentieth century.

2018-10-22 Esme Winter-Froemel The book series is dedicated to the study of the multifaceted dynamics of wordplay as an interface phenomenon. The contributions aim to bring together approaches from various disciplines and present case studies on different communicative settings, including everyday language and literary communication, and thus offer fresh perspectives on wordplay in the context of linguistic innovation, language contact, and speaker-hearer-interaction. La collection vise à analyser la diversité de la dynamique du jeu de mots en tant que phénomène d'interface. Les contributions réunissent les approches de différentes disciplines et présentent des études de cas de situations de communication variées, incluant tant le langage quotidien que la communication littéraire. Ainsi, elles offrent de nouvelles perspectives sur le jeu de mots dans le contexte de l'innovation linguistique, du contact linguistique, et de l'interaction locuteur-interlocuteur. Editorial Board: Salvatore Attardo (Texas A&M University Commerce, USA), Dirk Delabastita (Université de Namur, Belgium), Dirk Geeraerts (Katholieke Universiteit Leuven, Belgium), Raymond W. The essay was published as Appendix D of "A Tramp Abroad" by Mark Twain in 1880.

2015 Marius R. Busemeyer This book argues that critical choices about the institutional design of education systems in the post-war period have long-term implications for social inequality.

2013-06-20 Erik N. Jensen Body by Weimar argues that male and female athletes fundamentally recast gender roles during Germany's turbulent post-World War I years and established the basis for a modern body and modern sensibility that remain with us to this day.

2017 Robert Edelman Practiced and watched by billions, sport is a global phenomenon. Sport history is a burgeoning sub-field that explores sport in all forms to help answer fundamental questions that scholars examine. This volume provides a reference for sport scholars and an accessible introduction to those who are new to the sub-field.

2001 Didier Bourigault This first collection of selected articles from researchers in automatic analysis, storage, and use of terminology, and specialists in applied linguistics, computational linguistics, information retrieval, and artificial intelligence offers new insights on

computational terminology. The recent needs for intelligent information access, automatic query translation, cross-lingual information retrieval, knowledge management, and document handling have led practitioners and engineers to focus on automated term handling. This book offers new perspectives on their expectations. It will be of interest to terminologists, translators, language or knowledge engineers, librarians and all others dependent on the automation of terminology processing in professional practices. The articles cover themes such as automatic thesaurus construction, automatic term acquisition, automatic term translation, automatic indexing and abstracting, and computer-aided knowledge acquisition. The high academic standing of the contributors together with their experience in terminology management results in a set of contributions that tackle original and unique scientific issues in correlation with genuine applications of terminology processing.

2009 Sebastian Kempgen This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages, but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction. For "classic" linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints, while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation. To attain these objectives, the series will aim for a standard comparable to that of the leading handbooks in other disciplines, and to this end will strive for comprehensiveness, theoretical explicitness, reliable documentation of data and findings, and up-to-date methodology. The editors, both of the series and of the individual volumes, and the individual contributors, are committed to this aim. The languages of publication are English, German, and French. The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks; however no

inflexible pre-set limits will be imposed on the scope of each volume. The series is open-ended, and can thus take account of further developments in the field. This conception, coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care, means that there is no set timetable for the publication of the whole series. Each volume will be a self-contained work, complete in itself. The order in which the handbooks are published does not imply any rank ordering, but is determined by the way in which the series is organized; the editor of the whole series enlist a competent editor for each individual volume. Once the principal editor for a volume has been found, he or she then has a completely free hand in the choice of co-editors and contributors. The editors plan each volume independently of the others, being governed only by general formal principles. The series editor only intervene where questions of delineation between individual volumes are concerned. It is felt that this (modus operandi) is best suited to achieving the objectives of the series, namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume.

2017-01-30 Lukasz Wroblewski "Dr Lukasz Wroblewski's book Culture Management: Strategy and Marketing Aspects clearly recognises that the pressures on the cultural sector in the 21st Century are greater than ever before. Based on robust academic research within a practical industry context, this book addresses all the key issues related to marketing strategy and planning for the cultural industries. It will be an invaluable tool for managers, policy-makers and all those working in the creative and cultural world, and will help them to develop sound strategies for the future." Dr Kim Lehman Tasmanian School of Business and Economics, University of Tasmania "Dr Wroblewski's book explains clearly what has changed to make the use of business models necessary, even in organizations which might have resisted in the past. Globalization has resulted in a population which understands and appreciates art and culture created in other countries. While it might be agreed that this is beneficial for society, it means that cultural arbitrators within a country no longer have the authority to dictate what is accepted as culture. Managers now understand that to gain the support of the public they must explain the benefits of consuming their cultural product." Dr Bonita M.
