Going to the Mountain 2018-06-28 Ndaba Mandela 'You empower yourself and then you reach out to others.' Uplifting life lessons from one

of the greatest leaders the world has ever known... through the eyes of the grandson whose life he changed forever. In his book *Going to the Mountain*, Ndaba Mandela shares the story of his coming-of-age alongside South Africa's rebirth. It is a remarkable journey, and one that took him from the violent, segregated Soweto ghettos to his grandfather's presidential home. As a young boy, Ndaba was constantly shunted from place to place. But at eleven years old he was unexpectedly invited to live with his grandfather, Nelson Mandela, even though he had met him only once before, during a prison visit. And, slowly, they built a relationship that would affect both of them profoundly. Ndaba's teenage years were complicated, but as he approached his twenty-first birthday, Mandela decided that Ndaba was finally ready to 'go to the mountain' - a test of courage during which you become a man. At the end of this gruelling ritual journey, the elders of the Mandelas' tribe gathered and Ndaba's grandfather was there, as ever, to share his greatest life lessons. From Nelson Mandela, Ndaba learned the spirit of endurance, the triumph of forgiveness, the power of resistance and the beauty of reconciliation. And as Mandela grew older, Ndaba had the chance to repay his grandfather's love and support by demonstrating the ways in which he'd understood all that he had taught him. Intimate and inspirational, *Going to the Mountain* is a powerful reminder of how one person can impact profoundly on another, and a testament to the awesome power within us to change ourselves and our world.

Letters of a Russian Traveler, 1789-1790 2018-12-01 N. M. Karamzin During 1789-90, Nicholai Mikhailovich Karamzin, a young poet and short-story writer, toured Western Europe. On his return, he distilled his impressions in the form of travel letters. *Letters of a Russian Traveler, 1791-1801*, in which Karamzin's impressions are woven into a wealth of information about Western European society and culture that he derived from wide reading, became a favorite of readers and was widely imitated. The most influential prose stylist of the eighteenth century, Karamzin shaped the development of the Russian literary language, introducing many Gallicisms to supplant Slavonic-derived words and idioms and

breaking down the classicist canons of isolated language styles.

Life in Five Seconds 2012-11-08 Matteo Civaschi Winner of the Cannes Lions Bronze Award for Design 2013! In today's caffeine-charged, jet-fuelled, celebrity-a-minute world, who actually has the time to learn a thing or two? C'mon, let's face it, life's too bloody short. What you need is instant knowledge. Told in ingenious, award-winning pictograms that are witty, provocative and to the point, *Life in Five Seconds* takes over 200 important events, inventions, great lives, wonders of the natural world and cultural icons that you really need to know about, and then - hey presto! - cuts away all the useless details. The result is a hilarious visual snapshot that puts all of life into context. You'll laugh out loud as you identify everything from Satan to Santa Claus; Beethoven to Banksy; the Great Wall of China to the Berlin Wall; Elvis, Ikea, videogames and everything in-between. This is the perfect book for anyone with a sense of humour... and a short attention span.

Sustainable Logistics 2012-12-14 Wolf-Rüdiger Bretzke Currently the notion of "sustainability" is used in an inflationary manner. Therefore the authors start with a definition which is stable to serve as an anchor for further research as well as for discussions among scientists, managers and politicians, ideally across different disciplines. The character of this book is purely conceptual. The argumentation is based on comparison of new and demanding requisites with existing models (process and network architectures in the field of logistics). Formerly neglected impacts on the environment will be included. Main features of a new approach will be developed which are capable to avoid these impacts and to align logistics with the requirements of sustainability. In order to

make logistics sustainable large parts will have to be reinvented. The focus needs to be on decoupling transportation activities from economic growth rates.

Children and Everyday Life in the Roman and Late Antique World

2016-11-10 Christian Laes Children and Everyday Life in the Roman and Late Antique World explores what it meant to be a child in the Roman world - what were children's concerns, interests and beliefs - and whether we can find traces of children's own cultures. By combining different theoretical approaches and source materials, the contributors explore the environments in which children lived, their experience of everyday life, and what the limits were for their agency. The volume brings together scholars of archaeology and material culture, classicists, ancient historians, theologians, and scholars of early Christianity and Judaism, all of whom have long been involved in the study of the social and cultural history of children. The topics discussed include children's living environments; clothing; childhood care; social relations; leisure and play; health and disability; upbringing and schooling; and children's experiences of death. While the main focus of the volume is on Late Antiquity its coverage begins with the early Roman Empire, and extends to the early ninth century CE. The result is the first book-length scrutiny of the agency and experience of pre-modern children.

Cultures of Voting in Pre-modern Europe 2018-01-02 Serena Ferente Cultures of Voting in Pre-modern Europe examines the norms and practices of collective decision-making across pre-modern European

history, east and west, and their influence in shaping both intra- and inter-communal relationships. Bringing together the work of twenty specialist contributors, this volume offers a unique range of case studies from Ancient Greece to the eighteenth century, and explores voting in a range of different contexts with analysis that encompasses constitutional and ecclesiastical history, social and cultural history, the history of material culture and of political thought. Together the case-studies illustrate the influence of ancient models and ideas of voting on medieval and early modern collectivities and document the cultural and conceptual exchange between different spheres in which voting took place. Above all, they foreground voting as a crucial element of Europe's common political heritage and raise questions about the contribution of pre-modern cultures of voting to modern political and institutional developments. Offering a wide chronological and geographical scope, Cultures of Voting in Pre-modern Europe is aimed at scholars and students of the history of voting and is a fascinating contribution to the key debates that surround voting today.

Childhood in History 2017-07-20 Reidar Aasgaard Inquiring into childhood is one of the most appropriate ways to address the perennial and essential question of what it is that makes human beings - each of us - human. In Childhood in History: Perceptions of Children in the Ancient and Medieval Worlds, Aasgaard, Horn, and Cojocarú bring together the groundbreaking work of nineteen leading scholars in order to advance interdisciplinary historical research into ideas about children and childhood in the premodern history of European civilization. The volume gathers rich insights from fields as varied as pedagogy and medicine, and literature and history. Drawing on a range of sources in genres that extend from philosophical, theological, and educational treatises to law, art, and poetry, from hagiography and autobiography to school lessons and sagas, these studies aim to bring together these diverse fields and source materials, and to allow the development of new conversations.

This book will have fulfilled its unifying and explicit goal if it provides an impetus to further research in social and intellectual history, and if it prompts both researchers and the interested wider public to ask new questions about the experiences of children, and to listen to their voices.

Stranded in the Present 2010-04-10 Peter Fritzsche In this inventive book, Peter Fritzsche explores how Europeans and Americans saw themselves in the drama of history, how they took possession of a past thought to be slipping away, and how they generated countless stories about the sorrowful, eventful paths they chose to follow. In the aftermath of the French Revolution, contemporaries saw themselves as occupants of an utterly new period. Increasingly disconnected from an irretrievable past, worried about an unknown and dangerous future, they described themselves as indisputably modern. To be cast in the new time of the nineteenth century was to recognize the weird shapes of historical change, to see landscapes scattered with ruins, and to mourn the remains of a bygone era. Tracing the scars of history, writers and painters, revolutionaries and exiles, soldiers and widows, and ordinary home dwellers took a passionate, even flamboyant, interest in the past. They argued politics, wrote diaries, devoured memoirs, and collected antiques, all the time charting their private paths against the tremors of public life. These nostalgic histories take place on battlefields trampled by Napoleon, along bucolic English hedges, against the fairytale silhouettes of the Grimms' beloved Germany, and in the newly constructed parlors of America's western territories. This eloquent book takes a surprising, completely original look at the modern age: our possessions, our heritage, and our newly considered selves.

Undoing Gender 2004-10-22 Judith Butler Undoing Gender constitutes Judith Butler's recent reflections on gender and sexuality, focusing on new kinship, psychoanalysis and the incest taboo, transgender, intersex, diagnostic categories, social violence, and the tasks of social transformation. In terms that draw from feminist and queer theory, Butler considers the norms that govern--and fail to govern--gender and sexuality as they relate to the constraints on recognizable personhood. The book constitutes a reconsideration of her earlier view on gender performativity from Gender Trouble. In this work, the critique of gender norms is clearly situated within the framework of human persistence and survival. And to "do" one's gender in certain ways sometimes implies "undoing" dominant notions of personhood. She writes about the "New Gender Politics" that has emerged in recent years, a combination of

movements concerned with transgender, transsexuality, intersex, and their complex relations to feminist and queer theory.
