2009-10-15 Peter Beharrell First published in 1980, More Bad News is the Second Volume in the research findings of the Glasgow University Media Group. It develops the analytic findings and methods of the first volume Bad News through a series of Case Studies of Television News Coverage, and argues that much of what passes as balanced and factual news reporting is produced from a highly partial viewpoint. Focusing on the British economy in crisis, and its thematic linkage with the Social Contract during the first four months of 1975, the book deals with three main levels of activity: the story, the language and the visuals. As the book unpacks each level of routine news coverage a picture emerges which has the surface appearance of neutrality and balance but is in fact highly partial and restricted

2005-12 Stephen Blake Mettee Perhaps the best-kept secret in the publishing industry is that many publishers--both periodical publishers and book publishers--make available writer's guidelines to assist would-be contributors. Written by the staff at each publishing house, these guidelines help writers target their submissions to the exact needs of the individual publisher. The American Directory of Writer's Guidelines is a compilation of the actual writer's guidelines for more than 1,600 publishers. A one-of-a-kind source to browse for article, short story, poetry and book ideas.

2013-02-11 Alan Stephenson The Broadcast Announcing Worktext provides you with the skills, techniques, and procedures necessary to enter this highly competitive field of broadcast performance. In addition to the principles of good performance, this book addresses the importance of audience and how to communicate effectively to various groups. Television and radio studio environments, announcer specializations and responsibilities, and developing a broadcast delivery style are just a few of the many topics covered. Factual information is presented in brief, easy-to-digest modules and is enhanced with self-study questions and projects. The self-study provides an immediate check on what you learn, and the projects allow for a practical hands-on application of key concepts in the material. The worktext format, with many real-life examples, combines both traditional teaching and practical experience. A companion CD illustrates techniques and concepts in each chapter with audio and visual examples. This third edition will give you knowledge of other non-traditional forms of announcing, such as online radio announcing, podcast announcing, and other forms of online announcing, such as online shows, clips, and news.

2012-08-21 Geoff Scott This is a must for the serious Photoshop user! Power, Speed & Automation explores how to customize and automate Photoshop to increase your speed and productivity. 2016-04-15 Eric A. Zillmer The focus of Sports Medicine and Neuropsychology is the question of what role the neuropsychologist should have in the diagnosis, treatment, and management of sports-related concussions. The goal of this special issue is to examine the most current issues facing this growing and dynamic field of neuropsychology. The first article is dedicated to reviewing current issues in the neuropsychological assessment of concussions in sports-related events. The next paper examines data on over six million practice-and-game-exposures among athletes participating in the NCAA's Injury Surveillance System. Two contributions examine the empirical role that neuropsychologists can have in the area of concussion research. The final two papers review the advantages and limitations on computer-based assessment of sports-related concussions and discuss neuropsychology's role in return-to-play decisions following them.

2014-06-03 Terry M. Wood This inaugural issue is devoted to exploring measurement, research design, and statistics issues in six subdisciplines of exercise and sport science. Originally presented at the Eighth Measurement and Evaluation Symposium, all papers in this issue reflect the work of many renowned measurement specialists and content experts in their respective fields. The articles discuss the following topics: * standards of assessment quality for physical educators and the problem of providing adequate assessment without adequate resources; * the importance of properly conceptualizing and defining appropriate research questions as the "source and solution" for measurement and design issues in reference to motor learning/control and sport and exercise psychology; * the study of individuals -- single-subject and other small-sample designs -- in contrast to the more traditional study of groups; and * the importance of computing and reporting statistical power in research.

2014-04-16 Anthony Friedmann This updated edition of Writing for Visual Media will enable you to understand the nature of visual writing that lies behind the content of all visual media. This unique kind of writing must communicate to audiences through content producers, since audiences don't read the script. Most media content provides a solution to a communication problem, which the writer must learn to analyze and solve before writing the script. The Fourth Edition strengthens the method for creating content and writing in the correct language and established format for each visual medium, including commercial communication such as ads and PSAs, corporate communications, and training. An extended investigation into dramatic theory and how entertainment narrative works is illustrated by examples and detailed analysis of scenes, scripts and storylines, designed to save writers from typical pitfalls and releasing your creative powers of invention. Writing for Visual Media will help you to develop an improved foundation for understanding interactive media and writing for non-linear content, while gaining the tools to effectively connect with your audience

2001-01-01 Kenneth G. Budinski Annotation An engineer with experience in the automotive and chemical process industries, Budinski has compiled material he used to train new engineers and technicians in an attempt to get his co-workers to document their work in a reasonable manner. He does not focus on the mechanics of the English language, but on the types of documents that an average technical person will encounter in business, government, or industry. He also thinks that students with no technical background should be able to benefit from the tutorial. c. Book News Inc
