2008 Ronda Hughes "Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. 2006-06-17 Stephen Jay Gould The definitive refutation to the argument of The Bell Curve. When published in 1981, The Mismeasure of Man was immediately hailed as a masterwork, the ringing answer to those who would classify people, rank them according to their supposed genetic gifts and limits. And yet the idea of innate limits—of biology as destiny—dies hard, as witness the attention devoted to The Bell Curve, whose arguments are here so effectively anticipated and thoroughly undermined by Stephen Jay Gould. In this edition Dr. Gould has written a substantial new introduction telling how and why he wrote the book and tracing the subsequent history of the controversy on innateness right through The Bell Curve. Further, he has added five essays on questions of The Bell Curve in particular and on race, racism, and biological determinism in general. These additions strengthen the book's claim to be, as Leo J. Kamin of Princeton University has said, "a major contribution toward deflating pseudo-biological 'explanations' of our present social woes."

2018-12-06 Yoichi Mine This book reveals how the idea of human security, combined with other human-centric norms, has been embraced, criticized, modified and diffused in East Asia

(ASEAN Plus Three). Once we zoom in to the regional space of East Asia, we can see a kaleidoscopic diversity of human security stakeholders and their values. Asian stakeholders are willing to engage in the cultural interpretation and contextualization of human security, underlining the importance of human dignity in addition to freedom from fear and from want. This dignity element, together with national ownership, may be the most important values added in the Asian version of human security.

2021-07-08 Meighan Stone 'You'll be moved by the brave women in Awakening' Malala Yousafzai 'Awakening goes where no book has gone before. Inspiring, insightful, profoundly moving' Hillary Rodham Clinton All over the world, #MeToo inspired generations of women to fight in new ways for their rights. In Brazil, women run for office at the risk of intimidation and murder. In China, activists drown out internet censors and defy arrests. In Egypt, the president calls protestors terrorists. In Tunisia, activists bring down a predatory government minister. In Nigeria, the movement unites Muslim and Christian survivors. In Pakistan, actresses confront accused assailants in court. In Sweden, the movement rocks citizens to their core. Awakening reveals the true scope of the greatest global reckoning on women's rights in history.

2021-03-09 Emily Joy Allison When Emily Joy Allison outed her abuser on Twitter, she launched #ChurchToo, a movement to expose the culture of sexual abuse and assault utterly rampant in Christian churches in America. Not a single denomination is unaffected. And the reasons are somewhat different than those you might find in the #MeToo stories coming out of Hollywood or Washington. While patriarchy and misogyny are problems everywhere, they take on a particularly pernicious form in Christian churches where those with power have been insisting, since many decades before #MeToo, that this sexually dysfunctional environment is, in fact, exactly how God wants it to be.

#ChurchToo turns over the rocks of the church's sexual dysfunction, revealing just what makes sexualized violence in religious contexts both ubiquitous and uniquely traumatizing. It also lays the groundwork for not one but many paths of healing from a religious culture of sexual shame, secrecy, and control, and for survivors of abuse to live full, free, healthy lives.

2010-09-01 National Defense University Press Includes a foreword by Major General David A. Rubenstein. From the editor: "71F, or "71 Foxtrot," is the AOC (area of concentration) code assigned by the U.S. Army to the specialty of Research Psychology. Qualifying as an Army research psychologist requires, first of all, a Ph.D. from a research (not clinical) intensive graduate psychology program. Due to their advanced education, research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain. In terms of numbers, the 71F AOC is a small one, with only 25 to 30 officers serving in any given year. However, the 71F impact is much bigger than this small cadre suggests. Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding, preserving, and enhancing the health, well being, morale, and performance of Soldiers and military families. As is clear throughout the pages of this book, they do this in many ways and in many areas, but always

with a scientific approach. This is the 71F advantage: applying the science of psychology to understand the human dimension, and developing programs, policies, and products to benefit the person in military operations. This book grew out of the April 2008 biennial conference of U.S. Army Research Psychologists, held in Bethesda, Maryland. This meeting was to be my last as Consultant to the Surgeon General for Research Psychology, and I thought it would be a good idea to publish proceedings, which had not been done before. As Consultant, I'd often wished for such a document to help explain to people what it is that Army Research Psychologists "do for a living." In addition to our core group of 71Fs, at the Bethesda 2008 meeting we had several brand-new members, and a number of distinguished retirees, the "grey-beards" of the 71F clan. Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus, I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities. It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels, with no sign of easing, and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health, well being, and performance of Soldiers and their families."

2020-12-22 United States. Fort Hood Independent Review Committee The U. S. Secretary of the Army appointed the Fort Hood Independent Review Committee(FHIRC or Committee) and directed it to "conduct a comprehensive assessment of the Fort Hood command climate and culture, and its impact, if any, on the safety, welfare and readiness of our Soldiers and units." In addressing this mandate, the FHIRC determined that during the time period covered by the Review, the command climate relative to the Sexual Harassment/Assault Response and Prevention (SHARP) Program at Fort Hood was ineffective, to the extent that there was

apermissive environment for sexual assault and sexual harassment. As set forth in this Report, specific Findings demonstrate that the implementation of the SHARP Program was ineffective. During the review period, no Commanding General or subordinate echelon commander chose to intervene proactively and mitigate known risks of high crime, sexual assault and sexual harassment. The result was a pervasive lack of confidence in the SHARP Program and an unacceptable lack of knowledge of core SHARP components regarding reporting and certain victim services. Under a structurally weak and under-resourced III Corps SHARP Program, the Sexual Assault Review Board (SARB) process was primarily utilized to address administrative and not the actual substantive aspects of the Program. While a powerful tool by design, the SARB process became a missed opportunity to develop and implement proactive strategies to create a respectful culture and prevent and reduce incidents of sexual assault and sexual harassment. From the III Corps level and below, the SHARP Program was chronically under-resourced, due to understaffing, lack of training, lack of credentialed SHARP professionals, and lack of funding. Most of all, it lacked command emphasis where it was needed the most: the enlisted ranks. A resonant symptom of the SHARP Program's ineffective implementation was significant underreporting of sexual harassment and sexual assault. Without intervention from the NCOs and officers entrusted with their health and safety, victims feared the inevitable consequences of reporting: ostracism, shunning and shaming, harsh treatment, and indelible damage to their career. Many have left the Army or plan to do so at the earliest opportunity. As part of the command climate, the issues of crime and Criminal Investigation Division (CID) operations were examined. The Committee determined that serious crime issues on and off Fort Hood were neither identified nor addressed. There was a conspicuous absence of an effective risk management approach to crime incident reduction and Soldier victimization. A military installation is essentially a large, gated community. The Commander of a military installation possesses a wide variety of options to proactively address and mitigate the spectrum of

crime incidents. Despite having the capability, very few tools were employed at Fort Hood to do so. Both the Directorate of Emergency Services (DES) and the CID have a mandate and a role to play in crime reduction. Each contributed very little analysis, feedback and general situational awareness to the command toward facilitating and enabling such actions. This was another missed opportunity. The deficient climate also extended into the missing Soldier scenarios, where no one recognized the slippage in accountability procedures and unwillingness or lack of ability of noncommissioned officers (NCOs) to keep track of their subordinates. The absence of any formal protocols for Soldiers who fail to report resulted in an ad hoc approach by units and Military Police (MP) to effectively address instances of missing Soldiers during the critical first 24 hours, again with adverse consequences. Consistent with the FHIRC Charter, this Report sets forth nine Findings and offers seventy Recommendations.

1987-01-15 Panel on Adolescent Pregnancy and Childbearing, National Research Council Abstract: This book presents the findings, conclusions, and recommendations of the Committee on Child Development Research and Public Policy within the National Research Council. The panel examined research and existing programs which address the areas of adolescent sexuality, pregnancy, and childbearing with the intent of making

recommendations for policy making, program design, program evaluation, and research. The panel's report is presented in chapters addressing the following topics: trends in adolescent sexuality and fertility, society and changing roles of adolescents, determinants of sexual behavior, effects of adolescent childbearing, interventions, and priorities for data collection, research, policies, and programs. An accompanying volume contains the working papers on which the report was based. The working papers address three broad areas, which are: 1) influences on early sexual and fertility behavior, 2) consequences of early sexual and fertility behavior, and 3) programs and policies related to teen pregnancy and sexuality.

2012-10-12 Billie Wright Dziech First Published in 1998. In 1984, Billie Dziech co-wrote *The Lecherous Professor*, one of the first books to articulate the problem of sexual harassment on college campuses. Since that time a number of books exploring the issues, cases, and laws have moved the topic into the public eye. This work, the brainchild of a lawyer and an academic, reflects on some of the more controversial and overlooked aspects of sexual harassment and its litigation and law. Chapters cover the legal and regulatory evolution of the issue and its context in higher education at the end of the 20th century; the importance of having colleges approach policy making and harassment by analyzing their own environment; an examination of the treatment of women experiencing harassment, with special focus on women who appear unscathed by it; the situation of the male on campus and the problem of non-meritorious cases; the most familiar myths of consensual relationships and the role of bans in dealing with them; and the contention that the sexual harassment issue has exposed higher education's excesses and contradictions.

1997-08-30 National Academy of Engineering This guide offers helpful advice on how teachers, administrators, and career advisers in science and engineering can become better mentors to their students. It starts with the premise that a successful mentor guides students in a variety of ways: by helping them get the most from their educational experience, by introducing them to and making them comfortable with a specific

disciplinary culture, and by offering assistance with the search for suitable employment. Other topics covered in the guide include career planning, time management, writing development, and responsible scientific conduct. Also included is a valuable list of bibliographical and Internet resources on mentoring and related topics.

2011-07-06 Carl Sagan A prescient warning of a future we now inhabit, where fake news stories and Internet conspiracy theories play to a disaffected American populace "A glorious book . . . A spirited defense of science . . . From the first page to the last, this book is a manifesto for clear thought."—Los Angeles Times How can we make intelligent decisions about our increasingly technology-driven lives if we don't understand the difference between the myths of pseudoscience and the testable hypotheses of science? Pulitzer Prize-winning author and distinguished astronomer Carl Sagan argues that scientific thinking is critical not only to the pursuit of truth but to the very well-being of our democratic institutions. Casting a wide net through history and culture, Sagan examines

and authoritatively debunks such celebrated fallacies of the past as witchcraft, faith healing, demons, and UFOs. And yet, disturbingly, in today's so-called information age, pseudoscience is burgeoning with stories of alien abduction, channeling past lives, and communal hallucinations commanding growing attention and respect. As Sagan demonstrates with lucid eloquence, the siren song of unreason is not just a cultural wrong turn but a dangerous plunge into darkness that threatens our most basic freedoms. 2012-03-27 Margaret Atwood A powerfully and brilliantly crafted novel, *Bodily Harm* is the story of Rennie Wilford, a young journalist whose life has begun to shatter around the edges. Rennie flies to the Caribbean to recuperate, and on the tiny island of St. Antoine she is confronted by a world where her rules for survival no longer apply. By turns comic, satiric, relentless, and terrifying, Margaret Atwood's *Bodily Harm* is ultimately an exploration of the lust for power, both sexual and political, and the need for compassion that goes beyond what we ordinarily mean by love.

2012-05-07 Lynn Stout An in-depth look at the trouble with shareholder value thinking and at better options for models of corporate purpose. Executives, investors, and the business press routinely chant the mantra that corporations are required to “maximize shareholder value.” In this pathbreaking book, renowned corporate expert Lynn Stout debunks the myth that corporate law mandates shareholder primacy. Stout shows how shareholder value thinking endangers not only investors but the rest of us as well, leading managers to focus myopically on short-term earnings; discouraging investment and innovation; harming employees, customers, and communities; and causing companies to indulge in reckless, sociopathic, and irresponsible behaviors. And she looks at new models of corporate purpose that better serve the needs of investors, corporations, and society. “A must-read for managers, directors, and policymakers interested in getting America back in the business of creating real value for the long term.” —Constance E. Bagley, professor, Yale School of Management; president, Academy of Legal Studies in Business; and author of *Managers and the Legal Environment* and *Winning Legally* “A compelling call for radically changing the way business is done... The *Shareholder Value Myth* powerfully demonstrates both the dangers of the shareholder value rule and the falseness of its alleged legal necessity.” —Joel Bakan, professor, The University of British Columbia, and author of the book and film *The Corporation* “Lynn Stout has a keen mind, a sharp pen, and an unbending sense of fearlessness. Her book is a must-read for anyone interested in understanding the root causes of the current financial calamity.” —Jack Willoughby, senior editor, *Barron’s* “Lynn Stout offers a new vision of good corporate governance that serves investors, firms, and the American economy.” —Judy Samuelson, executive director, Business and Society Program, The Aspen Institute 1952 Committee on Nomenclature and Statistics American Psychiatric Association 2008-10-01 Catharine A. MacKinnon *div* When it was published twenty-five years ago, Catharine MacKinnon’s pathbreaking work *Sexual*

Harassment of Working Women had a major impact on the development of sexual harassment law. The U.S. Supreme Court accepted her theory of sexual harassment in 1986. Here MacKinnon collaborates with eminent authorities to appraise what has been accomplished in the field and what still needs to be done. An introductory essay by Reva Siegel considers how sexual harassment came to be regulated as sex discrimination. Contributors discuss how law can best address sexual harassment; the importance and definition of consent and unwelcomeness; issues of same-sex harassment; questions of institutional responsibility for sexual harassment in both employment and education settings; considerations of freedom of speech; effects of sexual harassment doctrine on gender and racial justice; and transnational approaches to the problem. An afterword by MacKinnon assesses the changes wrought by sexual harassment law in the past quarter century. /DIV

2015-07-15 Eli Clare *First* published in 1999, the groundbreaking *Exile and Pride* is essential to the history and future of disability politics. Eli Clare’s revelatory writing about his experiences as a white disabled genderqueer activist/writer established him as one of the leading writers on the intersections of queerness and disability and permanently changed the landscape of disability politics and queer liberation. With a poet’s devotion to truth and an activist’s demand for justice, Clare deftly unspools the multiple histories from which our ever-evolving sense of self unfolds. His essays weave together memoir, history, and political thinking to explore meanings and experiences of home: home as place, community, bodies, identity, and activism. Here readers will find an intersectional framework for understanding how we actually live with the daily hydraulics of oppression, power, and resistance. At the root of Clare’s exploration of environmental destruction and capitalism, sexuality and institutional violence, gender and the body politic, is a call for social justice movements that are truly accessible to everyone. With heart and hammer, *Exile and Pride* pries open a window onto a world where our whole selves, in all their complexity, can be realized, loved, and embraced.

2015-11-09 UNESCO There are fewer grounds

today than in the past to deplore a North-South divide in research and innovation. This is one of the key findings of the UNESCO Science Report: towards 2030. A large number of countries are now incorporating science, technology and innovation in their national development agenda, in order to make their economies less reliant on raw materials and more rooted in knowledge. Most research and development (R&D) is taking place in high-income countries, but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report. For many lower-income countries, sustainable development has become an integral part of their national development plans for the next 10-20 years. Among higher-income countries, a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards 'green' technologies. The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries. Written by more than 50 experts who are each covering the country or region from which they hail, the UNESCO Science Report: towards 2030 provides more country-level information than ever before. The trends and developments in science, technology and innovation policy and governance between 2009 and mid-2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come. 2014-02-04 Maurice M. Iwu With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000

species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.

2017-07-31 Mark Dimmock What does pleasure have to do with morality? What role, if any, should intuition have in the formation of moral theory? If something is 'simulated', can it be immoral? This accessible and wide-ranging textbook explores these questions and many more. Key ideas in the fields of normative ethics, metaethics and applied ethics are explained rigorously and systematically, with a vivid writing style that enlivens the topics with energy and wit. Individual theories are discussed in detail in the first part of the book, before these positions are applied to a wide range of contemporary situations including business ethics, sexual ethics, and the acceptability of eating animals. A wealth of real-life examples, set out with depth and care, illuminate the complexities of different ethical approaches while conveying their modern-day relevance. This concise and highly engaging resource is tailored to the Ethics components of AQA Philosophy and OCR Religious Studies, with a clear and practical layout that includes end-of-chapter summaries, key terms, and common mistakes to avoid. It should also be of practical

use for those teaching Philosophy as part of the International Baccalaureate. Ethics for A-Level is of particular value to students and teachers, but Fisher and Dimmock's precise and scholarly approach will appeal to anyone seeking a rigorous and lively introduction to the challenging subject of ethics. Tailored to the Ethics components of AQA Philosophy and OCR Religious Studies.

2015-01-01 Tom Inglis This book examines the extent and nature of Irish social and cultural difference. It is a collection of twenty-three short essays written in a clear and accessible manner by human scientists who are international

experts in their area. The essays cover topics covered include the nature of Irish nationalism and capitalism, the Irish political elite, the differences and similarities of the Irish family, the upsurge in immigration, Northern Ireland, the Irish diaspora, the Irish language, sport, music and many other topics. The book will be bought by those who have an academic and personal interest in Irish Studies. It will be attractive to those who are not familiar with the theories and methods of the human sciences and how they can shine a light on the transformations that have taken place in Ireland. Tom Inglis, the editor of the collection, is a sociologist who has written extensively on Irish culture and society.
