2015-05-11 Victoria Marsick The nature of the workplace and the workforce has changed rapidly in post-industrial society. Most workers are now facing the need for high levels of preparatory education, retraining for new jobs and the ability to continue learning at work in order to keep up with new developments. The book, first published in 1987, argues that training in the workplace often fails because it is based on conditions that no longer prevail in modern organisations. The mechanistic approach of the behaviourist paradigm, it is argued, views the organisation as a machine and training as the preparation of workers for machine-like work according to their levels in the hierarchy, much as on an assembly line. The humanists' advocacy of collaborative learning has changed but not fundamentally altered this conception. This book will be of interest to students of education and business management.

2012-09 Audite Nos People with learning difficulties are present in the community, but how many are treated as equal citizens? In True Citizenship, Civitas Vera lays out a new approach which is designed to help everyone become active and included citizens of their communities and involved within society. By using the seven values discussed within the book: support and care, respect, integrity for future generations, freedom of heart and mind, hope and courage, productive living and working, everyone can achieve true citizenship. This book provides guided explorations through the use of stories, questions and exercises for people with learning difficulties, parents, professionals, providers and commissioners.

1996-01-01 Civil Engineering Research Foundation Presents findings of an international symposium hosted by the Civil Engineering Research Foundation in Washington, DC, on February 4-8, 1996. This report identifies follow-up actions designed to strengthen international collaborative efforts to accelerate the introduction on innovative technologies and systems.

2019-07-29 Simon McGrath This handbook brings together and promotes research on the area of vocational education and training (VET). It analyzes current and future economic and labor market trends and relates these to likely implications for vocational education and training. It questions how VET engages with the growing power of human development approaches and with the sustainable development agenda. Equity and inclusion are discussed in a range of ways by the authors and the consideration of the construction of these terms is an important element of the handbook. It further addresses both the overall notion of system reform, at different scales, and what is known about particular technologies of systems reform across a variety of settings. Vocational learning and VET teacher/trainer education are discussed from a comparative perspective. National and comparative experiences are also shared on questions of equity and efficiency in funding in terms of those that fund and are funded, and for a range of funding methodologies. As well as reviewing existing gaps, this handbook is looking forward in identifying promising new directions in research and environment. Areas covered: The Changing World of Work | Editors: Margarita Pavlova and Salim Akoojee Skills for Sustainable Human Development | Editor: Lesley Powell Planning and Reforming Skills Systems | Editor: Robert Palmer Private Training Markets | Editors: Michael Gessler, Larissa Freund and Susanne Peters Vocational Learning | Editors: Karen Evans and Natasha Kersh Competence and Excellence | Editor: Kirby Barrick Measuring Learning and Instructional Performance | Editor: Esther Winther Supporting Learners | Editor: Joy Papier VET Teacher/Trainer Education | Editor: Volker Wedekind

2018 Mkhuseleli Jack Mkhuseleli 'Khusta' Jack was born on a white-owned farm in the Eastern Cape.

Evicted from their home, his family was split up, wandering between different relatives, with nowhere to live legally. The young Khusta had a fierce yearning to go to school. Meeting obstacles at every turn, he never gave up. Reaching high school in Port Elizabeth, against all the odds, his drive finds a new focus: freedom for his people. Through fiery years of activism, his resolve never wavered. Khusta Jack became a respected leader in the democratic movement. Today, as a successful businessman, he is as outspoken as always. A true story of sacrifice, courage and triumph. United States. Food and Drug Administration. Office of Management and Systems  
2007 Prashant Gupta Papers presented at the Nirma International Conference on Management, held at Ahmedabad during 5-7 January 2007.

2020-07-07 World Bank Group The COVID-19 pandemic has, with alarming speed, dealt a heavy blow to an already-weak global economy, which is expected to slide into its deepest recession since the second world war, despite unprecedented policy support. The global recession would be deeper if countries take longer to bring the pandemic under control, if financial stress triggers defaults, or if there are protracted effects on households and firms. Economic disruptions are likely to be more severe and protracted in emerging market and developing economies with larger domestic outbreaks and weaker medical care systems; greater exposure to international spillovers through trade, tourism, and commodity and financial markets; weaker macroeconomic frameworks; and more pervasive informality and poverty. Beyond the current steep economic contraction, the pandemic is likely to leave lasting scars on the global economy by undermining consumer and investor confidence, human capital, and global value chains. Being mostly a reflection of the recent plunge in global energy demand, low oil prices are unlikely to provide much of a boost to global growth in the near term. While policymakers' immediate priorities are to address the health crisis and moderate the short-term economic losses, the likely long-term consequences of the pandemic highlight the need to forcefully undertake comprehensive reform programs to improve the fundamental drivers of economic growth, once the crisis abates. Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). The January edition includes in-depth analyses of topical policy challenges faced by these economies, while the June edition contains shorter analytical pieces.

2014-01-15 Phillip J. Mackey This volume contains the proceedings of the David Robertson Honorary Symposium: Celebrating the Megascale, held at the TMS 2014 Annual Meeting in San Diego, California. Dr. David G.C. Robertson, Professor Emeritus of Metallurgical Engineering at the Missouri University of Science and Technology, has devoted his career to the education of highly skilled metallurgical professionals and to the science of all types and sizes of metallurgical processes, particularly those involving molten metals. The volume contains more than 70 papers covering the important topics and issues in metallurgy today including papers as follows: keynote papers covering a tribute to Robertson, workforce skills needed in the profession going forward, copper smelting, ladle metallurgy, process metallurgy and resource efficiency, new flash iron making technology, ferro-alloy electric furnace smelting and on the role of bubbles in metallurgical processing operations. Topics covered in detail in this volume include ferro-alloys, non-ferrous metallurgy, iron and steel, modeling, education, and fundamentals.

1980

1991 Booklet outlining the duties of company directors and their ethical and legal responsibilities. Produced by eight business organisations concerned about recent corporate practices, with a working group chaired by Henry Bosch, former head of the National Companies and Securities Commission.

2011-10-20 Yehuda Berg Drawing wisdom from the Zohar, this short kabbalistic text redefines this legendary period of time as a window for individuals and communities to reach "messiah consciousness." That means it's up to people, not some celestial savior, to ignite global change. All the natural disasters poverty, revolutions, anarchy, are wake-up calls to a fragmented humanity. The end is near, but as Yehuda explains this really means "the end of dominance of the human ego. In its place we will experience the unleashing of our true selves - the illuminated human soul." There must be a critical mass, a certain threshold of transformation to capitalize on this window, and when that occurs, the peoples of the world will function as one body while still appreciating our differences. Our collective minds have the power to bring an end to negative consciousness and birth a new existence right now.

2022-05-19 Odireleng Martin Ntwaeaborwa In recent decades, luminescent nanomaterials have generated great interest in the scientific community due to their unique properties, which are different from those of their bulk counterparts, and their use in a wide variety of applications. Today, luminescent nanomaterials are used in a number of applications such as displays, solid-state lighting, solar cells, long afterglow, dosimetry, theft prevention, medical imaging, phototherapy, and quantum and gas sensing. This book presents cutting-edge research from experts in the field of synthesis and characterization of luminescent nanomaterials and their potential applications. It covers interesting topics in semiconductor physics, photochemistry, physical chemistry, materials science, and luminescence, and will be useful for beginners and advanced researchers interested in this field.

2017-08-22 Kirsten Hannema Each year an editorial team selects noteworthy architectural projects in Dutch architecture, with particular attention to commissionership, architecture policy and projects that have achieved spectacular results with limited resources. We are proud that 'Amsterdam Oersoep', the artwork by artists Arno Coenen, Iris Roskam and Hans van Bentem, has been included in this year's edition!

2021-12-07 Joan Marques Practicing business with a conscience leaves no sector untouched. It trickles into how we treat our employees; approach our work in general; address stakeholders; engage in accounting, financial, and production management practices; implement and manage information technology; communicate on a direct and indirect basis; and market what we stand for. Business has encountered an interesting evolution in the first two decades of the twenty-first century, with social media as a catalyst aiding greater understanding and improvement regarding the critical value of soft skills, workplace diversity, change readiness, moral responsibility, sustainable awareness, and a general socially responsible mindset. This amalgamate spirit of business as we envision it in both the near and far future has found its way in all segments of business education, research, and practice. Adhering to the global trend of increased responsibility and evoking a constructive change in the narrative of business, this Research Companion serves as a critical reference work for business scholars and practitioners in various settings. It brings together contributing scholars from multiple business areas, from a variety of cultures and locations of the world, in order to achieve the compilation of a reference work that will find an expansive appeal. Including insights from the broad business spectrum ranging from internal managerial practices to strategic applications, including international sensitivity, this volume highlights the urgency for increased awareness in business decision-making on all fronts. It will be of great value to researchers, academics, practitioners, and students in the fields of corporate social responsibility, business ethics, leadership, organizational studies, and entrepreneurship.
