Ritual and the Moral Life 2012-03-26 David

Solomon In the twentieth century, in both China and the West, ritual became marginalized in the face of the growth of secularism and individualism. In China, Confucianism and its essentially ritualistic comportment to the world were vigorously suppressed during the Cultural Revolution (1966-1976) under Mao Zedong. But de-ritualization already took place as a result of the Chinese Revolution of 1911 under Sun Yat-Sen. In the West, while the process of de-ritualization has been generally more gradual, it has been nonetheless drastic. In contrast to this situation, this volume investigates the crucial role ritual plays in constituting the human understanding of their place in the cosmos, the purpose of their lives, and imbues human existence with a more complete sense of meaningfulness. This volume presents the work of philosophers from both China and the West as they reflect upon the constitutive role that ritual plays in human life. They reflect not only on ritual in general but also on specific Confucian and Christian appreciations of ritual. This provocative volume is a beacon of warning to Western philosophers, who think they have graduated from the trappings of ritual, and a beacon of hope for Eastern thinkers, who wish to avoid cultural fragmentation. The Editors, both Eastern and Western, have together created a seamless work that not only introduces ritual, but advances an argument for the contribution that ritual makes to cultural renewal. This volume is a work of philosophical

thinking about ritual doing, but challenges those who think to realize that the salvation of philosophical thinking rests in the particularity and contingency of ritual doing. Let us hope this volume is widely read, for it points to that which might renew the West. - Jeffrey P. Bishop, Saint Louis University

Parents and Schools 2015-05-01 William W. Cutler Who holds ultimate authority for the education of America's children—teachers or parents? Although the relationship between home and school has changed dramatically over the decades, William Cutler's fascinating history argues that it has always been a political one, and his book uncovers for the first time how and why the balance of power has shifted over time. Starting with parental dominance in the mid-nineteenth century, Cutler chronicles how schools' growing

bureaucratization and professionalization allowed educators to gain increasing control over the schooling and lives of the children they taught. Central to his story is the role of parent-teacher associations, which helped transform an adversarial relationship into a collaborative one. Yet parents have also been controlled by educators through PTAs, leading to the perception that they are "company unions." Cutler shows how in the 1920s and 1930s schools expanded their responsibility for children's well-being outside the classroom. These efforts sowed the seeds for later conflict as schools came to be held accountable for solving society's problems. Finally, he brings the reader into recent decades, in which a breakdown of trust, racial tension, and "parents' rights" have taken the story full circle, with parents and schools once again at odds. Cutler's book is an invaluable guide to understanding how parent-teacher cooperation, which is essential for our children's educational success, might be achieved.

Public Relations Writing Student Workbook 2004-11 Donald Treadwell Treadwell & Treadwell's Student Workbook gives students the opportunity to put their learning into practice. The workbook introduces four fictional clients, two of them new, for which students may "work" as they complete assignments. These clients include both commercial and non-profit organizations. A new "Research" section bridges the gap between

clients and the real world of the student's college city or region so that clients can be "localized" to the student's area. This will also be useful for faculty who choose to assign actual or other fictional clients. Key Features: More than 60 exercises link macro-level concepts and micro-level writing decisions to put principles into practice Allows students to craft their writing in a variety of situations to address real-world problems and persuade readers An initial research project helps students create a profile of their local college area so that they can write for "real" media and make decisions based on their own experience as well as on the client background provided New "Plan of Attack" forms for writing exercises guide students through the planning needed for writing projects and help faculty assess student thinking and understanding as well as message execution

learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms puts a heavier focus on what is important to know and why includes new essays on the politics of social studies education responds to opponents of project- or activity-based social studies instruction and multicultural education with a sharpened defense of both of these approaches throughout the book Intended as a text for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice.

Good News About Satan 2015-01-01 Bob Bevington The bad news of Satan, while serious, is overshadowed by the good news of Jesus. Here are the plain teachings of Scripture regarding Satan, demons, and spiritual warfare from a perspective that makes paramount the sovereignty of God and the finished work of Christ. Containing none of the unfruitful speculations so common to this topic, we believe it differs significantly from virtually every other book on the subject. - See more at: <http://www.cruciformpress.com/#sthash.cXvo7FHQ.dpuf>

Memory and Society 2013-04-03 Lars-Goran Nilsson Memory and Society explores the social factors which influence human memory and our conceptualisation of memory. It examines the relationships between memory, society and culture and considers the relevance of theories of memory to real world issues. The opening section deals with the topic of autobiographical memory. It looks at the role of the self; how the self is shaped by society but also how it is the self which encodes and constructs memories. The Reconstructive nature of episodic memory is considered and how the present acts as the basis for remembering the past, with the rememberer's beliefs, desires and interpretations playing a central role. The middle section looks at the influence of the social environment on learning. It debates the relevance of the application of basic principles gained in laboratory settings to learning and memory in social settings. These principles are used to throw light on topics such as e-learning, eyewitness testimonies and optimal treatment and thinking. Moreover, these real world scenarios are themselves used to throw light on

basic principles and how they can be improved. The final section looks at the social consequences and costs of memory deficits, covering normal aging and pathological changes in old age, memory deficits related to dyslexia, working memory problems in

everyday cognition, problems in executive functions in chronic alcoholics, and Korsakoff amnesics. It also examines methods of rehabilitation for everyday life. Incorporating contributions from leading international authorities in memory research, as well as new

data and ideas for the direction of future research, this book will be invaluable to psychologists working in the fields of memory and society.
