2019-11-01 Joseph W. Zarzynski Chronicles the history and archaeological study of Lake George, New York's sunken bateaux of 1758. In Ghost Fleet Awakened, Joseph W. Zarzynski reveals the untold story of a little-recognized sunken fleet of British warships, bateaux, from the French and Indian War (1755-1763). The story begins more than 250 years ago, when bateaux first plied the waters of Lake George, New York. Zarzynski enlightens readers with a history of these utilitarian vessels, considered the most important vessels that transported armies during eighteenth-century wars in North America, and includes their origins and uses. By infusing the book with underwater archaeology doctrine, Zarzynski shows the nautical significance of these colonial craft. In the autumn of 1758, the British command at Lake George made a daring decision to deliberately sink two floating batteries (radeaux), some row galleys and whaleboats, a sloop, and 260 bateaux, thereby placing the warships into wet storage and

protecting them from marauding French during the coming winter. In 1759, many submerged boats were raised but some were not. Then, in 1960, two divers rediscovered several sunken bateaux, dubbed the "Ghost Fleet." These shipwrecks were the focus of underwater archaeological investigations that provided archaeologists with opportunities to gain unprecedented insight into eighteenth-century lifeways. Zarzynski explores and explains shipwreck preservation techniques, the creation of shipwreck parks for scuba enthusiasts, and the many multifaceted programs developed by the nonprofit organization Bateaux Below to help protect these finite cultural treasures. "Zarzynski offers fascinating new research on bateau shipwrecks through the use of manuscripts, period newspaper accounts, and interviews. It is an outstanding piece of research, explaining the chronological history of cultural resource preservation. No other book provides this level of documentation on the role of bateaux during the wars of the eighteenth century." — Russell P. Bellico, author of *Empires in the Mountains: French and Indian War Campaigns in Forts in the Lake Champlain, Lake George, and Hudson River Corridor* "This is a major contribution to the field of American history, New York State history, underwater archaeology, and cultural resource management. There is no equivalent book that documents this story." — Timothy J. Runyan, editor of *Ships, Seafaring and Society: Essays in Maritime History*

2016-05-19 General Sir Richard Shirreff A chilling political thriller that is dangerously close to becoming reality According to General Sir Richard Shirreff, recently retired Deputy Supreme Allied Commander Europe we are already at war with Russia. Putin is waging war by unconventional means, including sponsoring terrorist attacks in Ukraine and in the UK and also cyber warfare. This book shows how war with Russia could erupt into conventional warfare with the bloodiest and most appalling consequences if the necessary steps are not taken urgently. As Admiral James G Stavridis, US Navy, former Supreme Allied Commander Europe, says 'You fail to read this book at your peril. Like any 'strongman', the Russian president's reputation for strength is everything. Lose momentum, fail to give the people what they want and he fails. Putin has already demonstrated that he has no intention of failing. He has already started a lethal dynamic which, unless checked right now, could see him invade the Baltic states. Russia's invasion and seizure of Georgia in 2008 was our 'Rhineland moment'. We ignored the warning signs - as we did back in the 1930s - and we made it 'business as usual'. Crimea in 2014 was the President's 'Sudetenland moment' and again he got away with it. Since 2014 Russia has invaded Ukraine. The Baltics could be next. Our political leaders assume that nuclear deterrence will save us. General Sir Richard Shirreff shows us why this will not wash.

But, at the last moment, she is smuggled out of her high security prison. The *Marble Armada* has called for her to accompany its ships as observer and liaison, as it spreads itself across the human Generality, enforcing the peace at all costs. 2010-10-21 Michelle Paver A terrifying 1930s ghost story set in the haunting wilderness of the far north. January 1937. Clouds of war are gathering

over a fogbound London. Twenty-eight year old Jack is poor, lonely and desperate to change his life. So when he's offered the chance to join an Arctic expedition, he jumps at it. Spirits are high as the ship leaves Norway: five men and eight huskies, crossing the Barents Sea by the light of the midnight sun. At last they reach the remote, uninhabited bay where they will camp for the next year. Gruhuken. But the Arctic summer is brief. As night returns to claim the land, Jack feels a creeping unease. One by one, his companions are forced to leave. He faces a stark choice. Stay or go. Soon he will see the last of the sun, as the polar night engulfs the camp in months of darkness. Soon he will reach the point of no return - when the sea will freeze, making escape impossible. And Gruhuken is not uninhabited. Jack is not alone. Something walks there in the dark...

2017-04-23 The reader should grasp clearly the date at which this book was written. It was done in 1907: it appeared in various magazines as a serial in 1908 and it was published in the Fall of that year. At that time the aeroplane was, for most people, merely a rumour and the "Sausage" held the air. The contemporary reader has all the advantage of ten years' experience since this story was imagined. He can correct his author at a dozen points and estimate the value of these warnings by the standard of a decade of realities. The book is weak on anti-aircraft guns, for example, and still more negligent of submarines. Much, no doubt, will strike the reader as quaint and limited but upon much the writer may not unreasonably plume himself. The interpretation of the German spirit must have read as a caricature in 1908. Was it a caricature? Prince Karl seemed a fantasy then. Reality has since copied Prince Carl with an astonishing faithfulness. Is it too much to hope that some democratic "Bert" may not ultimately get even with his Highness? Our author tells us in this book, as he has told us in others, more especially in *The World Set Free*, and as he has been telling us this year in his *War and the Future*, that if mankind goes on with war, the smash-up of civilization is inevitable. It is chaos or the United States of the World for mankind. There is no other choice. Ten years have but added an enormous conviction to the message of this book. It remains essentially right, a pamphlet story--in support of the League to Enforce Peace. K.

2024-01-25 Elliot Ackerman 'A rippingly good read' Wired From two former military officers and award-winning authors, a chillingly authentic geopolitical thriller that imagines a naval clash between the US and China in the South China Sea in 2034 - and the path from there to a nightmarish global conflagration On 12 March 2034, US Navy Commodore Sarah Hunt is conducting routine freedom of navigation patrol in the South China Sea. On that same day, US Marine aviator Major Chris 'Wedge' Mitchell is flying an F-35E Lightning, testing a new stealth technology as he flirts with Iranian airspace. By the end of that day, Wedge will be an Iranian prisoner, and Sarah Hunt's destroyer will lie at the bottom of the ocean. A new, terrifying era is at hand. So begins a disturbingly plausible novel, co-authored by an award-winning novelist and decorated Marine veteran and the former commander of NATO, a legendary admiral. Everything in 2034 is an imagination extrapolation from present-day facts on the ground, informed by the authors' years working at the highest and most classified levels of national security. Sometimes it takes a brilliant work of fiction to illuminate the most dire of warnings- this cautionary tale presents a dark yet possible future that we must do all we can to avoid. 'I could not stop reading 2034' Phil Klay, author of *Redeployment*

2015-03-13 George Mann New York City is being plagued by a pack of ferocious brass raptors attacking people and carrying them away into the night. The originator of these skeleton-like creations is a deranged military scientist, who is also part of a plot to escalate the cold war with Britain into a full-blown conflict. He is building a weapon - a weapon that will fracture dimensional space and allow the monstrous creatures that live on the other side to spill through -and only the Ghost and his unlikely allies can stop him.

1999 Robert D. Ballard Dr Robert Ballard's challenge for this work was to discover and photograph the ships sunk in the Battle of Midway, one of the most dramatic engagements of the Pacific War. After the bombing of Pearl Harbour in 1941, the Imperial Japanese Navy seemed almost unstoppable, and a final strike in Midway Island was planned by Admiral Yamamoto for June 1942. But the Americans, aware of the plan, were prepared for the attack and in a great victory sank three of the four Japanese carriers, losing only one of their own. The battle was a turning point in the Pacific War and never again would Japan take the offensive. The story of this battle is illustrated using Ballard's underwater photographs of the ships' remains, and Ken Marschall's evocative paintings.

2020-05-20 David Childress David Childress, popular author and star of the History Channel show *Ancient Aliens*, brings us the incredible tale of Nazi submarines and secret weapons in Antarctica and elsewhere. He looks into the strange life and death of Rudolf Hess, as well as the mystery of James Forrestal and the secret group called MJ-12. He examines Operation Highjump led by Admiral Richard Byrd in 1947 and the battle that he apparently had in Antarctica with flying saucers. Through "Operation Paperclip," the Nazis infiltrated aerospace companies, banking, media, and the US government, including NASA and the CIA after WWII. He reveals that the Nazis had built secret bases in a variety of places during WWII, including Greenland, the Canary Islands, Tibet and Antarctica. Childress discusses the secret U-boat fleet that patrolled the Atlantic and Antarctic Oceans for decades after the war. He looks into the secret German space program and its flying disks and tubular aircraft; the secret technology involved, including anti-gravity propulsion technology; underground and under ice bases; strange things happening in South America; and secret bases on the Moon and Mars. Childress looks at the possible merger of Nazi assets in Antarctic with the Americans' and the use of Antarctica as a space base for traffic to secret space stations in orbit and below the surface of the Moon. The author looks at military space programs such as Solar Warden, Lunex and Project Horizon. Does the US Space Force have a secret space program that maintains huge ships in orbit around the Earth and employs hundreds of astronauts as crew for these vehicles? Includes a 16-page color section.

2016-09-09 Harold Coyle This revised and updated edition of the classic Cold War novel *Team Yankee* reminds us once again might have occurred had the United States and its Allies taken on the Russians in Europe, had cooler geopolitical heads not prevailed. For 45 years after World War II, East and West stood on the brink of war. When Nazi Germany was destroyed, it was evident that Russian tank armies had become supreme in Europe, but only in counterpart to US air power. In 1945 US and UK bombers sent a signal to the advancing Russians at Dresden to beware of what the Allies could do. Likewise when the Russians overran Berlin they sent a signal to the Allies what their land armies could accomplish. Thankfully the tense standoff continued on either side of the Iron Curtain for nearly half a century. During those years, however, the Allies beefed up their ground capability, while the Soviets increased their air capability, even as the new jet and missile age began (thanks much to captured German scientists on both sides). The focal point of conflict remained central Germany—specifically the flat plains of the Fulda Gap—through which the Russians could pour all the way to the Channel if the Allies proved unprepared (or unable) to stop them. *Team Yankee* posits a conflict that never happened, but which very well might have, and for which both sides prepared for decades. This former *New York Times* bestseller by Harold Coyle, now revised and expanded, presents a glimpse of what it would have been like for the Allied soldiers who would have had to meet a relentless onslaught of Soviet and Warsaw Pact divisions. It takes the view of a US tank commander, who is vastly outnumbered during the initial onslaught, as the Russians pull out all the cards learned in their successful war against Germany. Meantime Western Europe has to speculate behind its thin screen of armor whether the New World can once again assemble its main forces—or willpower—to rescue the bastions of democracy in time.

2019-07-16 Mark Greaney From the *New York Times* bestselling author of the *Gray Man* series comes a startlingly realistic novel of World War III. A desperate Kremlin takes advantage of a military crisis in Asia to simultaneously strike into Western Europe and invade east Africa in a bid to occupy three Rare Earth mineral mines that will give Russia unprecedented control over the world's hi-tech sector for generations to come. Pitted against the Russians are a Marine lieutenant colonel pulled out of a cushy Pentagon job, a French Special Forces captain and his intelligence operative father, a young Polish partisan fighter, an A-10 Warthog pilot, and the commander of an American tank platoon who, along with his German

counterpart, fight from behind enemy lines. Through grand land, sea, and air battles to a small unit fighting hand-to-hand in the jungle, Russia and the US face off in a terrifying but thrilling battle for world dominance - with constant the threat of a Russian nuclear detonation ever present.

2014-11-04 Jamie Metzl *Blue Magic*, the latest designer drug linked to a rash of overdoses, might explain the needle mark on the arm of a young woman found dead in her Kansas City apartment. But when Star reporter Rich Azadian digs deeper, the clues point to a far more explosive story: MaryLee Stock was a special protégée of evangelical megapastor and power broker Cobalt Becker, who is poised to deliver his followers and the presidency to a firebrand right-wing senator in the next election. When Azadian sets out to prove that MaryLee's death was no accident and she may have been carrying Becker's genetically enhanced baby, the stakes become life itself. In 2023 America—bankrupt, violently divided by the culture wars, and beholden to archrival China—the rules of the game are complicated. With the danger mounting, the dead bodies of young women piling up, Chinese agents circling, and the US Department of National Competitiveness moving in to quash his investigation, Azadian's only option is to go rogue, assemble a team of brilliant misfits like himself, and begin the fight of his life to find out who is killing these women and why, and if any others like them may still be alive. 2002-06-03 Sextus Propertius *These ardent, even obsessed, poems about erotic passion are among the brightest jewels in the crown of Latin literature. Written by Propertius, Rome's greatest poet of love, who was born around 50 b.c., a contemporary of Ovid, these elegies tell of Propertius' tormented relationship with a woman he calls "Cynthia." Their connection was sometimes blissful, more often agonizing, but as the poet came to recognize, it went beyond pride or shame to become the defining event of his life. Whether or not it was Propertius' explicit intention, these elegies extend our ideas of desire, and of the human condition itself.*
