*Gutenberg* 2020-01-19 Stephan Füssel Named "Man of the Millennium"

in 1999, Johannes Gutenberg was the creator of one of the most influential and revolutionary inventions in Europe's history: a printing press with mechanical movable type. This development sparked the printing revolution, which is regarded as the milestone of the second millennium and represents one of the central contributions in the turn to modernity. His printing press came to play a key role in the development of the Renaissance, the Reformation, and the Age of Enlightenment, providing the material foundation for the modern knowledge-based economy and the spread of learning to the masses. His invention revolutionized the way that information is shared and broadened the boundaries of who has access to written knowledge. Paving the way for bibliophiles of today, the Gutenberg Bible of 1454 remains one of the most famous books in history. Gutenberg's technical innovations remained unrivalled for almost 350 years, until industrialization of the printing industry and the digital revolution built on the advances that he began, increasing the rate at which information is spread. Despite his significance in forming the world as we know it, there has not yet been a rigorous and accessible biography of Gutenberg published in English. Written by the leading expert on Gutenberg, Füssel's biography brings together high academic standards and thorough historical details in a highly readable text that conveys everything you need to know about the man who changed printing forever.

*Rulers of the Horoscope* 2008-04-01 Alan Oken A practical and thorough treatment on the meanings of all aspects of planetary and house rulerships, Rulers of the Horoscope: Finding Your Way Through the Labyrinth is the definitive sourcebook on this topic. Alan Oken masterfully guides you through the labyrinth of delineating and synthesizing the complex interchange between rulers of houses and their signs and the nature of the houses they occupy and rule. He defines and describes derivative houses, planetary and house rulerships, dispositorships, mutual reception and the compatibility and nature of importance of their placement in the horoscope. The astrological charts of well-known people are illustrated with detailed descriptions of planetary relationships, their positive and negative aspects, and the traditional and modern interpretation of the houses. Alan Oken's in-depth exploration of the ruler for each of the twelve houses and the rulers of the rising sign is an invaluable tool for astrology students and teachers alike.

*Weiss's Herbal Medicine* 2001 Rudolf Fritz Weiss The classic edition is back! First published in 1988, Weiss's Herbal Medicine is revered by herbalists and medical professionals alike as the seminal work in the field of phytotherapy. This book has established itself as an indispensable resource and is widely acknowledged as the key text in the field of medical herbalism. You will find clear, detailed information on treating conditions ranging from colds and influenza to rheumatic problems, metabolic and endocrine disorders, cancer, and much more. Conveniently arranged by organ system, the text provides guidelines for prescribing herbal remedies, with sections on dosage, application, and precautionary measures. Plus, for each plant discussed, you will find lists of their occurrence, botanical features, differentiation from related species, constituents, and medical benefits. Proprietary formulations, full references, and a comprehensive subject index of almost 2,000 entries

round out the superb coverage! Weiss's life's work examines the subject of herbal medicine from both a clinical and practical viewpoint, incorporating his personal observations and clinical experience with scientific studies. This material formed the basis of *Herbal Medicine, 2E*, also by Thieme. The second edition, revised, expanded and modernized by Volker Fintelmann, streamlines the work into a more clinical text, incorporating the latest scientific research and Commission E findings on the efficacy of herbs. This edition is recommended for allopathic physicians and other medical professionals who are new to the field of herbal medicine. Professor Rudolf Fritz Weiss (1895-1991) is highly regarded as the founding father of modern German phytotherapy. He studied botany and medicine at the University of Berlin, qualifying as a doctor in 1922 and subsequently taking additional qualifications in internal medicine. A teaching post in herbal medicine was interrupted by war service as an army doctor, followed by seven years in Russian captivity as a doctor in prisoner-of-war camp hospitals. After retiring from clinical practice in 1961, he devoted his life to the scientific development and acceptance of herbal medicine. Weiss was appointed as a member of the German Commission E in 1978. He was founder and editor of the *Zeitschrift fuer Phytotherapie*, and lectured on current advances in the subject at the University of Tuebingen.

The Owl Who Liked Sitting on Caesar 2014-02-27 Martin Windrow 'Perched on the back of a sunlit chair was something about 9 inches tall and shaped rather like a plump toy penguin with a nose-job. It appeared to be wearing a one-piece knitted jumpsuit of pale grey fluff with brown stitching, complete with an attached balaclava helmet. From the face-hole of the fuzzy balaclava, two big, shiny black eyes gazed up at me trustfully. Kweep, it said quietly.' When author Martin Windrow met the tawny owlet that he christened Mumble, it was love at first sight. Raising her from a fledgling, through adolescence and into her prime years, Windrow recorded every detail of their time living together (secretly) in a south London tower block, and later in a Sussex village. This is the touching, intriguing and eccentric story of their 15-year relationship, complete with photographs and illustrations of the beautiful Mumble. Along the way, we are given fascinating insight into the ornithology of owls - from their evolution and biology to their breeding habits and hunting tactics. *The Owl Who Liked Sitting on Caesar* is a witty, quirky and utterly charming account of the companionship between one man and his owl.

**Kräuter-Rezeptbuch** 2014-03-25 Siegrid Hirsch Ist es zeitgemäß, mit Kräutern zu arbeiten? Ist es wichtig, Heilpflanzen zu sammeln, zu ziehen

oder Kräuterprodukte für sich selbst herzustellen? Ja - mehr denn je! Unvergängliche Klassiker der Naturheilkunde wie das Johanniskrautöl oder der Veilchensirup, der Franzbranntwein oder der Hustensaft aus Tannenwipfeln wirken am verlässlichsten, wenn sie von eigener Hand zubereitet wurden, wenn sie aus eigenem Sammelgut stammen. Menschen haben sich im Laufe der Geschichte viele Methoden einfallen lassen, um das Optimale aus den Heilpflanzen herauszuholen. Hier finden Sie die geballte Kraft der Kräuter in über 350 authentischen Rezepten und Tipps aus der Volksheilkunde. Ein Ratgeber zur Herstellung wertvoller Hausmittel. Von der Tinktur über den Kräuternessig, das Kräuteröl, Marmeladen, Sirup und Säften bis zu den Salben reicht die Palette. Die Rezepte sind praxisgerecht und Schritt für Schritt leicht nachzuvollziehen. A bis Z-Tabellen mit heimischen Pflanzen, die essbar sind und mit Vitalstoffen und Enzymreichtum punkten, machen das Buch vollständig. Die Rezeptesammlung vermittelt altes Wissen aus der Kräutergemeinschaft FNL (Freunde naturgemäßer Lebensweise). Der gemeinnützige Verein sammelt seit 60 Jahren überlieferte Rezepte aus der Volksheilkunde und gibt sie weiter. Von der Autorin stammt der Bestseller "Die Kräuter in meinem Garten".

**Fruits of Warm Climates** 2013-06 Julia F. Morton --- Hardcover edition contains COLOR IMAGES! --- I don't want to suppose. I want to know. - Julia Frances Morton *Fruits of Warm Climates* is the encyclopedia for those who want to know! In one definitive volume, Morton explores the world of tropical and subtropical fruit, providing information on the history of the plants, cultivation techniques, food and alternative uses, nutrition, varieties, and much more. Written in a professional yet accessible voice, *Fruits of Warm Climates* is a must-have for anyone interested in tropical horticulture. Valuable for researchers as well as home and commercial growers, *Fruits of Warm Climates* masterfully packages the essential information on familiar and not-so-familiar tropical fruit. With over 400 pages containing hundreds of images, the volume is overflowing with information on countless varieties of fruits. Years after its original publication, *Fruits of Warm Climates* remains a leading text on the subject and the pinnacle work of economic botanist Julia F. Morton. It is an important resource for every agricultural, research, and science library. Julia F. Morton was Research Professor of Biology and Director of the Morton Collectanea (a research and information center devoted to economic botany) at the University of Miami. She received a D. Sc. from Florida State University in 1973 and was elected Fellow of the Linnean Society of London in 1974. She has held numerous positions in the field including President of the Florida State Horticulture Society, a member of the Board of Trustees of Fairchild Tropical Garden, and served on the Board of Directors of the Florida National Parks and Monuments Association. She is the author of 10 books and co-author of 12 others.

**Human Pathogenic Fungi** 2014 Derek J. Sullivan Fungi cause a spectrum of diseases in humans, ranging from comparatively innocuous superficial skin diseases caused by dermatophytes to invasive life-threatening infections caused by species such as *Candida albicans*, or *Cryptococcus neoformans*. Due to the opportunistic nature of most invasive mycoses, fungal pathogenicity has proven difficult to define. However, the application of new genomic and other molecular techniques in recent years has revolutionized the field, revealing fascinating new insights into the mechanisms of fungal pathogenesis. In this book, a panel of high profile contributors critically review the most important research to provide a timely overview. The book is divided into two sections. The first six chapters review the transformative effect of applying state-of-the-art tools and innovative approaches to research, particularly in the area of comparative biology. The second section consists of eight chapters, each dedicated to the molecular and cellular biology of a major fungal pathogen of humans: *Candida*, *Aspergillus*, *Cryptococcus*, *Dermatophytes*, *Histoplasma*, *Blastomyces*, *Pneumocystis*, and *Paracoccidoides*. These chapters provide a timely snapshot of the current state of research. The book will be an essential reference for students, researchers, and clinicians with an interest in fungal pathogenesis. *Methods for the Determination of Vitamins in Food* 2012-12-06 D. Brubacher In the course of the project COST 91 \*, on the Effects of Thermal Processing and Distribution on the Quality and Nutritive Value of Food, it became clear that approved methods were needed for vitamin

determination in food. An expert group on vitamins met in March 1981 to set the requirements which these methods must meet. On the basis of these requirements, methods were selected for vitamin A,  $\beta$ -carotene, vitamin B1 (thiamine), vitamin C and vitamin E. Unfortunately, for vitamins B2 (riboflavin), B6 and D only tentative methods could be chosen, since the methods available only partially fulfilled the requirements set by the expert group. For niacin and folic acid some references only could be given because none of the existing methods satisfied these requirements, and for vitamin B, vitamin K, pantothenic acid and 12 biotin it was not considered possible to give even references. All methods were carefully described in detail so that every laboratory worker could use them without being an expert in vitamin assay. In October 1983 an enlarged expert group on vitamins approved the compilation of methods and approached a publishing house with a view to publication. The editors wish to thank Dr Peter Zeuthen, the leader of the project COST 91, for his interest in their work, and Mr G.
