It was never about brains or ability. His students simply didn't have the knowledge of the specific language needed to succeed. Through experimentation and research, he discovered that for any subject there was a list of essential words, that, when mastered, unlocked a student's ability to progress in the subject. Lewis called this set of vocabulary the "Insider's Words". When he applied these "Insider's Words" the results were incredible. His students began to learn with ease. He was on his way to developing the landmark series of workbooks and applications to teach this "Insider's Language" to students around the world.

WAIS-III Assessing Adolescent and Adult Intelligence, the classic text from Alan Kaufman and Elizabeth Lichtenberger, has consistently provided the most comprehensive source of information on cognitive assessment of adults and adolescents. The newly updated Third Edition provides important enhancements and additions that highlight the latest research and interpretive methods for the WAIS-III. Augmenting the traditional "sequential" and "simultaneous" WAIS-III interpretive methods, the authors present a new approach derived from Cattell-Horn-Carroll (CHC) theory. This approach combines normative assessment (performance relative to age peers) with ipsative assessment (performance relative to the person's own mean level). Following Flanagan and Kaufman's work to develop a similar CHC approach for the WISC-IV, Kaufman and Lichtenberger have applied this system to the WAIS-III profile of scores along with integrating recent WAIS-III literature. Four appendices present the new method in depth. In addition to a detailed description, the authors provide a blank interpretive worksheet to help examiners make the calculations and decisions needed for applying the additional steps of the new system, and norms tables for the new WAIS-III subtest combinations added in this approach. Assessing Adolescent and Adult Intelligence remains the premier resource for the field, covering not only the WAIS-III but also the WJ III, the KAIT, and several brief measures of intelligence, as well as laying out a relevant, up-to-date discussion of the discipline. The new, theory-based interpretive approach for the WAIS-III makes this a vital resource for practicing psychologists, as well as a comprehensive text for graduate students.

**Renaissance and Reform in Tudor England** 2010-04-29 Tracey A. Sowerby Sir Richard Morison (c.1513-1556) is best known as Henry VIII's most prolific propagandist. Yet he was also an accomplished scholar, politician, theologian and diplomat who was linked to the leading political and religious figures of his day. Despite his prominence, Morison has never received a full historical treatment. Based on extensive archival research, *Renaissance and Reform in Tudor England* provides a well-rounded picture of Morison that contributes significantly to the broader questions of intellectual, cultural, religious, and political history. Tracey Sowerby contextualizes Morison within each of his careers: he is considered as a propagandist, politician, reformer, diplomat and Marian exile. Morison emerges as a more influential and original figure than previously thought.
