Organisations, Competition and the Business Environment 2000 André Clark Organisations, Competition and the Business Environment has three distinct aims. Firstly, to develop an understanding of the context in which firms operate. Secondly, to build a stock of knowledge about the different components of the Business Environment, with particular reference to the UK and Europe. Thirdly, to investigate how firms interpret the Business Environment and their role within it, since this will affect both how they deal with changes in it, and how they go about 'managing' it to achieve their strategic objectives. Organisations, Competition and the Business Environment provides a rigorous introduction to the Business Environment from the perspective of the firm. Parts I and II of the text are designed to meet the needs of those undertaking HND and introductory undergraduate courses in Business Studies. Part III develops issues raised in the first two parts and makes the overall package suitable for MBA students as well.

Understanding Enterprise 2012-11-02 Simon Bridge The emergence of an enterprise culture and entrepreneurial economy has led to the rapid development of theories, policies and practices in the field of entrepreneurship. Understanding Enterprise provides a critical introduction to enterprise in its broadest context, particularly its application to business through entrepreneurship and small business. The book is divided into three distinct parts, which examine traditional approaches to entrepreneurship, new perspectives on the subject, and the success or otherwise of government policy. Key features: - Extensively revised to take into account the latest thinking and research - Reassessment of traditional views and a critique of conventional wisdom - Updated coverage of the impact and failings of comparative government policies - A good balance between theoretical and practical perspectives Understanding Enterprise is an essential companion for undergraduate and postgraduate students of entrepreneurship. Policy makers and practitioners will also benefit from this comprehensive guide.

New Venture Creation 2018-02-13 Paul Burns If you are looking for an engaging textbook, rich in learning features, which will help you to guide your students through the process of developing and launching a start-up, this is it. With his innovative New Venture Creation Framework, Paul Burns breaks the venture creation process up into three key phases: Research, Business Model Development, and Launch. At every stage crucial steps and considerations are revealed, providing comprehensive coverage of the subject. Practical advice is combined with academic research, enabling you to run a course which is both relevant and rigorous. The second edition of this popular textbook is essential reading for any undergraduate or postgraduate course in new venture creation. It will also prove useful for shorter courses on entrepreneurship and in enterprise centres and entrepreneurship hubs. New to this Edition: - Thought-provoking video interviews with author Paul Burns examine key questions - Video and audio cases provide an insight into life as an entrepreneur - A fictional running case study offers insight on thematic concepts as applied to one example - A greater variety of case studies, ranging from well-known businesses to smaller, local initiatives - A new Workbook design, with space for students to write their answers and ideas - Closer alignment of the content to the innovative New Venture Creation Framework, resulting in a textbook that is clear and easy to follow - An interactive ebook version of the text available for purchase

Human Resource Management in Construction Projects 2013-04-26 Andrew Dainty The construction sector is one of the most complex and problematic arenas within which to manage people. As a result, the applicability of much mainstream human resource management (HRM) theory to this industry is limited. Indeed, the operational realities faced by construction organizations mean that all too often the needs of employees are subjugated by performance concerns. This has potentially dire consequences for those who work in the industry, for the firms that employ them and ultimately, for the prosperity and productivity of the industry as a whole. In this new edition of their leading text, Andrew Dainty and Martin Loosemore have assembled a collection of perspectives which critically examine key aspects of the HRM function in the context of contemporary construction organizations. Rather than simply update the previous edition, the aim of this second edition is to provide a more critical commentary on the ways in which the industry addresses the HRM function and how this affects those who work within the industry. To this end, the editors have gathered contributions from many of the leading thinkers within construction HRM to critique the perspectives presented in the first edition. Each contributor either tackles specific aspects of the HRM function, or provides a critical commentary on industry practice. The authors explain, using real-life case studies, the ways in which construction firms respond to the myriad pressures that they face through their HRM practices. Together the contributions encourage the reader to rethink the HRM function and its role in defining the employment relationship. This provides essential reading for students of construction and project management, and reflective practitioners who are interested in theoretically informed insights into industry practice and its implications. ?
