Chronicles 1978-04-27 Jean Froissart The Chronicles of Froissart (1337-1410) are one of the greatest contemporary records of fourteenth-century England and France. Depicting the great age of Anglo-French rivalry from the deposition of Edward II to the downfall of Richard II, Froissart powerfully portrays the deeds of knights in battle at Sluys, Crecy, Calais and Poitiers during the Hundred Years War. Yet they are only part of this vigorous portrait of medieval life, which also vividly describes the Peasants' Revolt, trading activities and diplomacy against a backdrop of degenerate nobility. Written with the same sense of curiosity about character and customs that underlies the works of Froissart's contemporary, Chaucer, the Chronicles are a magnificent evocation of the age of chivalry.

The Federalist Papers 2018-08-20 Alexander Hamilton Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

Educating the Student Body 2013-11-30 Institute of Medicine Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

The Talented Tenth 2020-10-13 W E B Du Bois Taken from "The Talented Tenth" written by W. E. B. Du Bois: The Negro race, like all races, is going to be saved by its exceptional men. The problem of education, then, among Negroes must first of all deal with the Talented Tenth; it is the problem of developing the Best of this race that they may guide the Mass away from the contamination and death of the Worst, in their own and other races. Now the training of men is a difficult and intricate task. Its technique is a matter for educational experts, but its object is for the vision of seers. If we make money the object of man-training, we shall develop money-makers but not necessarily men; if we make technical skill the object of education, we may possess artisans but not, in nature, men. Men we shall have only as we make manhood the object of the work of the schools-intelligence, broad sympathy, knowledge of the world that was and is, and of the relation of men to it-this is the curriculum of that Higher Education which must underlie true life. On this foundation we may build bread winning, skill of hand and quickness of brain, with never a fear lest the child and man mistake the means of living for the object of life.

Liberating Learning 2009-07-15 Terry M. Moe Praise for Liberating Learning "Moe and Chubb have delivered a truly stunning book, rich with the prospect of how technology is already revolutionizing learning in communities from Midland, Pennsylvania to Gurgaon, India. At the same time, this is a sobering telling of the realpolitik of education, a battle in which the status quo is well defended. But most of all, this book is a call to action, a call to unleash the power of technological innovation to create an education system worthy of our aspirations and our children's dreams." Ted Mitchell, CEO of the New Schools Venture Fund "As long as we continue to educate students without regard for the way the real world works, we will continue to limit their choices. In Liberating Learning, Terry Moe and John Chubb push us to ask the questions we should be asking, to have the hard conversations about how far technology can go to advance student achievement in this country." Michelle Rhee, Chancellor of Education for the Washington, D.C. schools "A brilliant analysis of how technology is destined to transform America's schools for the better: not simply by generating new ways of learning, but also and surprisingly by unleashing forces that weaken its political opponents and open up the political process to educational change. A provocative, entirely novel vision of the future of American education." Rick Hanushek, the Paul and Jean Hanna Senior Fellow at the Hoover Institution, Stanford University "Terry Moe and John Chubb, two long-time, astute observers of educational reform, see technology as the way to reverse decades of failed efforts. Technology will facilitate significantly more individualized student learning and perhaps most importantly, technology will make it harder and harder for the entrenched adult interests to block the reforms that are right for our kids. This is a provocative, informative and, ultimately, optimistic read, something we badly need in public education." Joel Klein, Chancellor of the New York City schools
