A companion volume to Illuminations, the first collection of Walter Benjamin's writings, Reflections presents a further sampling of his wide-ranging work. Benjamin moves seamlessly from literary criticism to autobiography to philosophical-theological speculations, cementing his reputation as one of the greatest and most versatile writers of the twentieth century. "This book is just that: reflections of a highly polished mind that uncannily approximate the century's fragments of shattered traditions." —Time

*De Sphaera of Johannes de Sacrobosco in the Early Modern Period* 2020-01-01 Matteo Valleriani This open access book explores commentaries on an influential text of pre-Copernican astronomy in Europe. It features essays that take a close look at key intellectuals and how they engaged with the main ideas of this qualitative introduction to geocentric cosmology. Johannes de Sacrobosco compiled his Tractatus de sphaera during the thirteenth century in the frame of his teaching activities at the then recently founded University of Paris. It soon became a mandatory text all over Europe. As a result, a tradition of commentaries to the text was soon established and flourished until the second half of the 17th century. Here, readers will find an informative overview of these commentaries complete with a rich context. The essays explore the educational and social backgrounds of the writers. They also detail how their careers developed after the publication of their commentaries, the institutions and patrons they were affiliated with, what their agenda was, and whether and how they actually accomplished it. The editor of this collection considers these scientific commentaries as genuine scientific works. The contributors investigate them here not only in reference to the work on which it comments but also, and especially, as independent scientific contributions that are socially, institutionally, and intellectually contextualized around their authors.

### **Kondratieff Waves, Warfare and World Security**

2006 Tesselano C. Devezas "Considerable progress has been made in understanding the underlying mechanisms driving the long-wave behavior of the world socioeconomic development. In spite of this progress one recognizes that many aspects related with these underlying driving forces remained unsolved. One of these aspects

endured, perhaps as the most controversial one: the close relationship between K-waves and the outbreak of major wars. Social scientists and politicians are well acquainted with the fact that chance events have been responsible for the outbreak of wars and their course and outcome. Two main trends are now acknowledged: the increasing recognition of the existence of some cyclical patterns of warfare involving the core of the world system, and a shift toward newly evolving patterns involving non-state actors and asymmetric warfare. We may tentatively agree that wars are not merely the result of blind social and political forces, but patterned according to long socioeconomic cycles and the result of deep and general laws underlying the co-evolutionary unfolding of the world system. In the first part of this book, the reader will find a mix of contributions dealing with new visions or revisions of the concept of long waves considered from very different perspectives related to their unfolding. Those contributions discussing the issue of K-waves and their relation with military conflicts objectively, following old and / or new conceptualizations of the phenomenon, were selected to form the book's second part. Finally those contributions with strong emphasis on the analysis of future scenarios, related or not related with warfare and / or world security compose the body of the third part."

**Sacred Men** 2019-11-22 Keith L. Camacho Between 1944 and 1949 the United States Navy held a war crimes tribunal that tried Japanese nationals and members of Guam's indigenous Chamorro population who had worked for Japan's military government. In *Sacred Men* Keith L. Camacho traces the tribunal's legacy and its role in shaping contemporary domestic and international laws regarding combatants, jurisdiction, and property. Drawing on Giorgio Agamben's notions of bare life and Chamorro concepts of retribution, Camacho demonstrates how the U.S. tribunal used and justified the imprisonment, torture, murder, and exiling of accused Japanese and Chamorro war criminals in order to institute a new American political order. This U.S. disciplinary logic in Guam, Camacho argues, continues to directly inform the ideology used to justify the Guantánamo Bay detention center, the torture and enhanced interrogation of enemy combatants, and the American carceral state.

**The Romance Languages** 1960 W. D. Elcock This study of the emergence of Romance and its

crystallization into French, Spanish, Italian, Rumanian, etc. elucidates not only the creation of the modern languages but also the decline of Latin. The author provides as a setting the world of 'Vulgar Latin', a Roman world where the Latin tongue showed all the anarchical tendencies of popular speech and to which the mingling peoples in the Empire brought new and linguistically exotic elements. He explains how, from the fifth century to the ninth, the forces which procured Rome's political weakening at the same time accelerated the disintegration and differentiation of the Latin vernacular, though enriching it with contributions of their own-- Germanic, Arabic, and Slavonic.

**Reciprocals and Reflexives** 2008-11-06 Ekkehard König This collection of original papers is a representative survey of recent theoretical and cross-linguistic work on reciprocity and reflexivity. Its most remarkable feature is its combination of formal approaches, case studies on individual languages and broad typological surveys in one volume, showing that the interaction of formal approaches to grammar and typology may lead to new insights and results for both fields. Among the major issues addressed in this volume are the following: How can our current knowledge about the space and limits of variation in the relevant domain be captured in a structural typology of reciprocity? What light can such a typology shed on the facts of particular languages or groups of languages (e.g. Austronesian)? How can recent descriptive and typological insights be incorporated into a revised and more adequate version of the Binding Theory? How do verbal semantics, argument structure and reciprocal markers interact? How can we explain the pervasive patterns of ambiguity observable in these two domains, especially the use of the same forms both as reflexive and reciprocal markers? What are the major sources in the historical development of reciprocal markers? This combination of large-scale typological surveys with in-depth studies of particular languages

provides new answers to old questions and raises important new questions for future research.

**Illuminations** 2015-11-05 Walter Benjamin Illuminations contains the most celebrated work of Walter Benjamin, one of the most original and influential thinkers of the 20th Century: 'The Work of Art in the Age of Mechanical Reproduction', 'The Task of the Translator' and 'Theses on the Philosophy of History', as well as essays on Kafka, storytelling, Baudelaire, Brecht's epic theatre, Proust and an anatomy of his own obsession, book collecting. This now legendary volume offers the best possible access to Benjamin's singular and significant achievement, while Hannah Arendt's introduction reveals how his life and work are a prism to his times.

*Hippu* 2015-05-05 Oili Tanninen Hippu the mouse invites Heppu the dog to live with him.

*The Boyash in Hungary* 2019 Thede Kahl The present book is concerned with the language and culture of the Boyash "Gypsies" in southern Hungary, who speak archaic dialects of Romanian and call themselves "baiasi". Their varieties may be regarded as endangered, with the spoken vernaculars, Argelean and Muncan, suffering different degrees of loss. The Muncan vernacular investigated in the village of Alsoszentmarton is most probably in the second stage of loss, during which the language of the majority increasingly spreads into the language of the minority, while the latter is used mostly within the family by the elderly. Hungarian is beginning to replace the Boyash language even in everyday life. The Argelean dialect from the village of Gilvanfa and from Pecs is in the third stage, which is characterized by the loss of vocabulary and the inability to create new words, as the majority language has definitively replaced the minority language. Factors such as way of life, social structures, the intensity of contact with the majority population, religion, the prestige of the language, the code function of minority languages and economic dependency have all played a decisive role in the progressive replacement of the Boyash language by the majority language Hungarian, a process that

dramatically accelerated in the second half of the 20th century and especially after Hungary's accession to the EU. In the last three decades, the Argelean vernacular has enjoyed greater prestige than the Muncan and it is highly probable that the Argelean vernacular will become the dominant one if the Boyash language survives in the Argeleni communities.

**The Romance Languages** 1996-09-05 Rebecca Posner What is a Romance language? How is one Romance language related to others? How did they all evolve? And what can they tell us about language in general? In this comprehensive survey Rebecca Posner, a distinguished Romance specialist, examines this group of languages from a wide variety of perspectives. Her analysis combines philological expertise with insights drawn from modern theoretical linguistics, both synchronic and diachronic. She relates linguistic features to historical and sociological factors, and teases out those elements which can be attributed to divergence from a common source and those which indicate convergence towards a common aim. Her discussion is extensively illustrated with new and original data, and an up-to-date and comprehensive bibliography is included. This volume will be an invaluable and authoritative guide for students and specialists alike.

**Astronautical Research 1971** 2012-12-06 L.G. Napolitano The International Astronautical Federation is the only professional society in the field of aerospace engineering and Sciences which brings together specialists of all countries interested in the exploration and peaceful exploitation of space. At its annual Congresses a large number of invited and/or carefully selected contributed papers are presented which cover a wide variety of topics and are distributed over a number of sessions, each one being organized by two leading scientists who later chair the session itself. Each year the selection of specific topics to be dealt with. is dictated either by significant

new progress achieved in some sectors or by new developments and trends which are liable to influence substantially the objectives toward which space research and/or application of space technology will be oriented in the immediate future. A second rigorous screening, performed with the help of the Session Chairmen and carried out according to the same criteria identifies finally the papers which are published in the Proceedings. The outcome of all this is reliable and authoritative information as to the actual status and future trends of space activities, both from the research point of view and from the point of view of utilization and/or application.

*Support Structures* 2009 Céline Condorelli "Support structures is a manual for what bears, sustains, props and holds up. It is the culmination of many endeavours. The first is the collaborative project "Support Structures" by Céline Condorelli and Gavin Wade from 2003-2009. The second is a critical enquiry by Condorelli that exposes an almost complete absence of literature or theory of what constitutes "support". This book is itself articulated as a supporting structure, a manual for engagement in and with its subject, which attempts both functionally and structurally to operate much like it." -- Foreword.

[Unpacking My Library](#) 2022-08 Walter Benjamin "I fully realize that my discussion of the mental climate of collecting will confirm many of you in your conviction that this passion is behind the times, in your distrust of the collector type. Nothing is further from my mind than to shake either your conviction or your distrust." Walter Benjamin was one of the great cultural critics of the twentieth century. In *Unpacking My Library* he offers a strikingly personal meditation on his career as a book collector and on the strange relations that spring up between objects and their owners. Witty, erudite and often moving, this book will resonate with bibliophiles of all kinds.
