2011-10-04 Jeremy Rifkin The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful "Third Industrial Revolution." He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an "energy internet," just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

story of greed, power and excess. THE INTERNATIONAL BESTSELLER AND MAJOR MOVIE SENSATION, DIRECTED BY MARTIN SCORSESE AND STARRING LEONARDO DICAPRIO 'What separates Jordan's story from others like it, is the brutal honesty.' - Leonardo DiCaprio By day he made thousands of dollars a minute. By night he spent it as fast as he could. From the binge that sunk a 170-foot motor yacht and ran up a \$700,000 hotel tab, to the wife and kids who waited for him for at home, and the fast-talking, hard-partying young stockbrokers who called him king and did his bidding, here, in Jordan Belfort's own words, is the story of the ill-fated genius they called THE WOLF OF WALL STREET. In the 1990s Jordan Belfort became one of the most infamous names in American finance: a brilliant, conniving stock-chopper who led his merry mob on a wild ride out of the canyons of Wall Street and into a massive office on Long Island. It's an extraordinary story of greed, power and excess no one could invent - and then it all came crashing down. 2003-08 Veniamin Kaverin Two Captains is the most renowned novel of the Russian writer Veniamin Kaverin. The plot spans from 1912 to 1944. For more than half a century the book has been loved by children and adults alike. The novel has undergone more than 100 printings, including translations into other languages. Based on its story, plays have been staged and an opera has been written. The plot of the book also became the basis of two movies of the same title in 1955 and 1976. In 1995 in Pskov, the home town of the author, a monument was erected to the characters of the book and a "Two Captains" museum was opened. The real prototype for Captain Tatarinov was Lieutenant Georgii Brusilov, who in 1912 organized a privately funded expedition seeking a west-to-east Northern sea route. The steamship "St. Anna," specially built for the expedition, left Petersburg on 28 July 1912. Near the shores of Yamal peninsula it was seized by ice and carried in the ice drift to the north of the Kara Sea. The expedition survived two hard winters. Of the 14 people who left the stranded steamship in 1914, only two made it to one of the islands of Frants-Joseph Land and were spotted and taken aboard "St. Foka", the ship of the expedition of G. Y. Sedov. The ship log they had kept with them contained the most important of the scientific data, after the study of which Sedov's expedition found the previously unknown island in the Kara Sea, Vize Island. The ultimate fate of "St. Anna" and its remaining crew is still unknown. Veniamin Kaverin (1902-1989) wrote novels, short stories, fairy tales, memoirs, and biographies. In the early 1920s, Veniamin Kaverin was a member of experimental literary group "Serapionovi bratya". In 1946 his novel Two Captains became the winner of the USSR State Literature Award.

2014-09-08 Geoff King The independent sector has produced many of the most distinctive films to have appeared in the US in recent decades. From 'Sex, Lies and Videotape' in the 1980s to 'The Blair Witch Project' and New Queer Cinema in the 1990s and the ultra-low budget digital video features of the 2000s, indie films have thrived, creating a body of work that stands out from the dominant Hollywood mainstream. But what exactly is 'independent' cinema? This, the first book to examine the question in detail, argues that independence can be defined partly in industry terms but also according to formal and aesthetic strategies and by distinctive attitudes towards social and political issues, suggesting that independence is a dynamic rather than a fixed quality. Chapters focus on distribution and relationships with Hollywood studios; narrative ('Clerks' and 'Slacker' to 'Pulp Fiction', 'Magnolia' and 'Memento') and other formal dimensions (from 'Blair Witch's' 'authenticity' to expressive and stylized camerawork and editing in work from Harmony Korine to the Coen brothers); approaches to genre and alternative socio-political visions.

2021-06-01 Ahmed A. Elkhoully This book reviews the economic potential of various natural resources found in the Egyptian deserts that could help fill the food gap in Egypt, e.g., the date palm, olives, and domestic animals. Bearing in mind that the entire country is subject to arid or hyperarid climatic conditions, only a small portion (3% of total area) is agriculturally productive in comparison, the dominant deserts. These aspects, combined with a growing population (ca. 100 million citizens) and water resources scarcity, have produced severe adverse effects on natural resource utilization. This book presents innovative methods for addressing desert soil's key problems (soil erosion, salinity, pollution, decreased fertility, minerals, and weed and pest control). Its goal is to help authorities reclaim the desert and optimally utilize the minerals and the available natural resources to support the sustainability agenda 2030. Besides, it offers researchers guidance on remaining gaps and future research directions. Lastly and importantly, it provides essential information on investment opportunities in desert cultivation, such as the fields of food, fodder, and medicinal plants.
