**Marriages and Families** 2003-07 Karen Seccombe In this fresh, more structural, alternative to other texts for the marriage and family course, Seccombe and Warner provide a comprehensive look at close relationships and the family in just 15 chapters. Examining close relationships and families by placing them in social context, the authors offer a unique emphasis on the structural and relational aspects of the family with a focus on family resilience. The text weaves together a macro view - social structural analysis of close relationships- with the macro - an individualist view. The authors demonstrate the interaction of theory and methodology in family studies in Chapter 2 and blend cutting-edge research and practical applications throughout. Among the highlights of this first edition are the exceptionally thorough exploration of the topics of singlehood and cohabitation in Chapter 7 and the unique six-

chapter core (8-13) that focuses on all aspects of parenthood and the challenges and crises that families face today. The authors' emphasis on family resilience and how families can be strengthened is reflected in the "Constructing Strong Families" boxes that appear throughout the text. These features encourage students to apply groundbreaking research on what makes a family strong to their own families and in the concluding chapter, "Looking Ahead: Helping Families Flourish," which examines the factors that successful families -regardless of ethnicity, culture, or social class- consistently exhibit.

Families of Two 2000-09-26 Laura Carroll According to American Demographics magazine, by the year 2010 the number of married couples without children is expected to increase by nearly 50%, to nearly 31 million. The non-profit organization, Childless By Choice, reports that one in seven married couples in the United States is consciously deciding not to have children. For more married couples than ever before, their life plan together does not include raising a family. Yet, as these numbers grow, in many ways society continues to frown on the choice not to have children. Although more couples are making this decision, they often feel misunderstood, and face societal misperceptions about themselves, their marriage, and their choice not to have children. Through candid interviews and photographs, Families of Two: Interviews with Happily Married Couples Without Children by Choice takes us into the lives of happily married couples without children by choice. It dispels the myths often associated with this choice, helps couples who are deciding whether to have children, and offers insight to friends and family of couples who have chosen or may choose not to have children. Families of Two expands our ways of

understanding marriage in today's society, and gives examples of roadmaps for marriage without children. *Families of Two* celebrates the many people who are living lives that do not include parenthood, and the many ways to live happily ever after.
